HRMS-BUSINESS REQUIREMENT DOCUMENT

Business Requirements Document for Integrated Employee, Attendance, Leave, Payroll, Asset & HR Management System

HR & Workforce Management System

Modules need to be discussed:

1. Employee on boarding
2. Attendance
3. Leave
4. Pay role
5. Employee Exit?
6. Reports

Employee On boarding

Flow	Role	Description
Employee Register	HR	1. The system will support **two companies (Vishal Enterprise, Vrishal Eng. Pvt. Ltd.)**. 2. Each employee must be registered and mapped to **one specific company**. 3. An employee may be registered as a **Direct Employee** or through a **Contractor**. 4. Employee type must be captured as **Permanent / Temporary / Contract / Trainee / Other**, as applicable. 5. Each employee must be mapped to the applicable **Location / Branch / Department / Category / Designation**. 6. Employee status should be maintained as **Active / Inactive / Resigned / Terminated / Transferred**, etc. 7. The system should maintain the employee's complete history for company, department, designation, contractor and other changes.
Data Entry	HR	1. All **mandatory fields** must be completed before the employee registration can be submitted. 2. The system should validate duplicate employee records based on defined identifiers such as **Aadhaar, PAN, mobile number, etc.** 3. All required employee information should be captured: a. Personal Information b. Relative / Family Information c. Career / Employment Information d. Contractor Information, where applicable e. Salary Structure f. Bank / Payment Information g. Statutory Information h. Previous Employment i. Education & Skills j. Emergency Contact Information k. Attendance & Shift Information l. Leave Configuration 4. Employee records should have an **Effective From Date** for employment-related configurations. 5. The system should provide **Save as Draft** and **Submit** options. 6. Once submitted, changes to critical information should require appropriate authorization. 7. The system shall provide a dedicated **Gate Pass Number** field in the Employee Master/Registration module. • The **Gate Pass Number shall be unique** across the system/company, as per the configured uniqueness scope.

		• The field shall be **non-mandatory**, allowing employee registration without a Gate Pass Number where one is not applicable or not yet assigned. • If a Gate Pass Number is entered, the system shall validate it against existing records and **prevent duplicate Gate Pass Numbers**. • The Gate Pass Number can be added or updated later by an authorized user, subject to the same uniqueness validation. • Changes to the Gate Pass Number shall be captured in the **audit/history log**, including previous value, new value, changed by, and changed date/time. • The Gate Pass Number may be used for **employee identification, gate/security access, reports, and integration with relevant gate-pass or access-control systems**, where applicable.
Document Upload	HR	1. All required employee documents must be uploaded as per the configured document checklist. 2. Documents may include: a. Aadhaar b. PAN c. Bank Proof / Cancelled Cheque d. Appointment Letter e. Educational Certificates f. Experience Letters g. Address Proof h. Photograph i. Other applicable documents 3. The system should allow configuration of **mandatory and optional documents**. 4. File type and maximum file-size validation should be applied. 5. Each document should have a **document type, upload date, uploaded by and verification status**. 6. Document replacement/version history should be maintained.
Document Verification	HO TEAM – Head Office	1. Uploaded documents must be verified before final employee activation. 2. Verification can be performed through **Manual Verification** and **eKYC**, where applicable. 3. Each document should have a status such as **Pending / Verified / Rejected**. 4. Rejected documents should have a **rejection reason** and should be returned to HR for correction/re-upload. 5. Verification date and verifier details should be recorded. 6. The system should maintain an **audit trail** of verification activities.
Employee Unique ID Generation	HO TEAM – Head Office	1. Each employee must have a **unique employee ID** for identification. 2. Employee ID should be generated based on the applicable **company-wise company code + numbering convention**. 3. The employee ID should remain unique within the system and Company wise. 4. If an employee changes from one company to another, a **new company-specific employee ID** will be generated, as per business rules.

		5. The previous employee ID and new employee ID should be linked through an **employee history/reference**. 6. Employee ID should not be reused for another employee.
Biometric Registration	HO TEAM – Head Office	1. Each location may have a separate **biometric device/system**. 2. Employees must be registered with the biometric device applicable to their assigned location. 3. Biometric registration should be mapped against the **Company + Employee Unique ID**. 4. The system should maintain biometric device/location mapping 5. Transfer of an employee to another location should trigger the required **biometric mapping/update**. Or automatically shift details to another device, we will check the fisibility. 6. The system should prevent duplicate biometric IDs/fingerprints where technically supported. 7. Biometric registration status should be maintained as **Pending / Registered / Failed / Deactivated**.
Attendance Integration	HO TEAM – Head Office	1. Attendance will be calculated/marked **shift-wise**. 2. Each employee must be assigned a shift based on **Company + Category**. 3. Shift configuration should include: a. Company b. Category c. Shift Name/Code d. Shift Start Time e. Shift End Time f. Working Hours g. OT Applicable h. OT Criteria i. Grace Period j. Weekly Off 4. Male and Female employees may have **different shift timings**, if required by business rules. 5. Attendance should be integrated with biometric devices. 6. The system should identify **Present, Absent, Late, Early Out, Half Day, Missing Punch and OT**, as applicable. 7. Overnight shifts should be supported where a shift crosses midnight. 8. Shift changes should maintain an effective-date history.
Automatic Attendance	HO TEAM – Head Office	1. Automatic attendance processing will be based on **biometric punches + assigned shift + attendance rules**. 2. The system should automatically calculate working hours from the available punches. 3. Late arrival should be calculated based on the configured **Grace Period**. 4. Overtime should be calculated based on the configured **OT rules**. 5. Missing punches should be identified and flagged for correction/approval. 6. The system should support attendance regularization for authorized users. 7. Attendance exceptions should be available for HR/HO TEAM review. 8. Attendance should be locked/finalized after the defined payroll cut-off period. 9. Any modification after attendance finalization should require authorization and maintain an audit trail.

Flow	Role	Description
Shift Assignment	HO TEAM / HR	Employee should be assigned a shift based on Company, Category, Location and applicable employee rules. Shift assignment should have an effective date and history.
Leave Configuration	HR	Define applicable leave categories, entitlement, opening balance, carry-forward and leave rules for the employee.
Employee Transfer	HO TEAM / HR	Support transfer between company/location/department/category. System should update shift, biometric, reporting manager and other applicable mappings while maintaining history.
Salary Activation	HR / Payroll	Salary structure should be activated only after required employee information and documents are completed/verified.
Payroll Integration	Payroll	Attendance, OT, leave and employee salary structure should be integrated for payroll processing.
Attendance Regularization	HR / HO TEAM	Employee/authorized user can request correction for missing punches, wrong attendance, late/early attendance, etc. Approval history should be maintained.
Employee Exit	HR / HO TEAM	Capture resignation/termination, last working date, exit reason, asset return, biometric deactivation and final status.
Audit Trail	HO TEAM / Admin	All critical employee, salary, attendance, document and biometric changes should record **who changed it, what changed, when it changed, and previous/new values**.

Employee eKYC:

Title	Key Points	Description
eKYC Verification	**Initial Verification**	1. Employee eKYC should be initiated after employee registration/data entry. 2. The system should validate the employee's submitted information through the configured eKYC mechanism. 3. eKYC status should be maintained as **Pending / In Process / Verified / Failed / Rejected / Exception / Resubmission Required**. 4. The system should capture the verification response/reference number and date/time where supported.

Title	Key Points	Description
eKYC Rejection	**Failed Verification**	1. If eKYC fails, the employee should **not be permanently rejected immediately**. 2. The system should capture the specific **failure/rejection reason**. 3. The employee/HR should be given an opportunity to correct the information and resubmit. 4. A configurable **resubmission period of 2–3 weeks** should be provided as per company policy. 5. The system should display the **Resubmission Due Date**. 6. The employee record should remain in **eKYC Pending / Resubmission Required** status during this period.
eKYC Exception	**Special Cases**	The system should support exceptions such as: 1. Aadhaar OTP not received. 2. Aadhaar does not have a registered/verified mobile number. 3. Employee does not have access to the registered mobile number. 4. Employee does not have a mobile phone. 5. OTP authentication failure. 6. Biometric authentication failure. 7. Demographic information mismatch. 8. Name/DOB/Gender mismatch between employee record and Aadhaar data. 9. Aadhaar number invalid/not available. 10. Technical/API/integration failure. 11. Aadhaar authentication temporarily unavailable. 12. Other manually defined exception reasons.
Alternative Verification	**Exception Approval**	1. If OTP-based eKYC cannot be completed, the system should provide an **Exception Verification** workflow, subject to the organization's permitted process. 2. HR should be able to upload/record supporting documents where required. 3. HO TEAM/authorized verifier should review the exception.

Title	Key Points	Description
		4. The verifier may **Approve / Reject / Send Back for Correction**. 5. The system should clearly distinguish **eKYC Verified** from **Exceptionally Verified / Manually Verified**.
Resubmission	**Correction & Re-Verification**	1. Employee/HR should be able to correct the failed information. 2. The system should allow eKYC to be resubmitted within the configured period. 3. Previous failed attempts should remain in history. 4. The system should record **Attempt Number, Date, Reason and Result**. 5. The system should prevent unlimited resubmissions if a maximum attempt rule is configured.
Reminder / Escalation	**Pending eKYC**	1. The system should generate reminders before the resubmission deadline. 2. HR should receive a list of employees whose eKYC is pending. 3. Escalation should occur when the configured deadline is approaching or has expired. 4. Example: reminder at **7 days remaining, 3 days remaining and due date**. 5. The reminder frequency should be configurable.
eKYC Deadline	**2–3 Week Period**	1. The organization should configure the allowed eKYC correction/resubmission period, e.g. **14 or 21 days**. 2. The countdown should start from the defined event, such as the **first failed verification / exception creation**. 3. The deadline should be visible to HR. 4. After the deadline, the system should automatically change the status to **eKYC Deadline Expired**. 5. Further processing should require authorized intervention.
Final Decision	**Approval / Rejection**	1. After successful eKYC, status becomes **Verified**.

Title	Key Points	Description
		2. If an acceptable exception is approved, status becomes **Exceptionally Verified / Manual Verification Approved**, according to company terminology. 3. If the employee fails to provide required information within the allowed period, status may become **Rejected / Verification Failed / On Hold** based on company policy. 4. Final rejection should require an authorized user.
Employee Activation	**Impact on Employee Master**	1. The company should define whether an employee can be activated before eKYC completion. 2. If eKYC is mandatory before activation, the employee should remain **Pending Verification** until successful verification/approved exception. 3. If provisional joining is permitted, the employee may be activated with a **Verification Pending** flag. 4. Payroll, biometric and attendance access can be controlled based on the employee's verification status.
Audit Trail	**Complete Verification History**	1. Every eKYC attempt must be recorded. 2. Maintain **Attempt Number, Date/Time, Verification Mode, Result, Failure Reason, Submitted By and Verified By**. 3. Maintain previous and corrected information where appropriate, without exposing unnecessary Aadhaar data. 4. All manual overrides must require authorization and remarks.

Blacklist

Title	Key Points	Description
Blacklist Employee	**Central Blacklist Master**	1. The system should maintain a centralized **Employee Blacklist / Rehire Restriction Master**. 2. The blacklist should be applicable across **all companies under the organization**. 3. An employee identified as restricted should not be allowed to create a new employee registration in any company without authorized clearance. 4. The restriction should be linked to the person's verified identity and not only to the previous Employee ID.

Title	Key Points	Description
Primary Identification	**Aadhaar / Identity Matching**	1. During employee registration, the system should check whether the individual already exists in the central employee/blacklist database. 2. Aadhaar-based identity verification may be used where legally and technically permitted. 3. The system should preferably store a **secure token/reference or masked identifier**, rather than using the raw Aadhaar number as the system's employee identifier. 4. Aadhaar should not be the only matching criterion. 5. Matching should be performed using permitted identity attributes and verified records. UIDAI specifically states that Aadhaar number should not be used as a domain-specific identifier. (UIDAI)
eKYC Verification	**Identity Verification**	1. eKYC should be performed according to the configured verification process. 2. The system should verify relevant identity information such as **Name, Date of Birth and other permitted attributes**. 3. eKYC failure should not automatically mean that the employee is blacklisted. 4. A failed eKYC should go through the **eKYC Exception / Resubmission** process defined earlier. 5. Only an authorized decision should result in a blacklist/re-hire restriction.
Previous Employment Check	**Employee History**	1. Search previous employment records across **all companies**. 2. Check previous Employee ID, Company, Department, Contractor, Joining Date and Last Working Date. 3. Check previous exit status such as **Normal Exit / Resigned / Terminated / Absconded / Disciplinary Exit**, as applicable. 4. The previous employee record should be linked to the new registration attempt.
Blacklist Criteria	**Business Rules**	Blacklist/re-hire restriction may be triggered based on approved company criteria such as: 1. Confirmed fraudulent documents or identity fraud.

Title	Key Points	Description
		2. Proven serious misconduct under company policy. 3. Proven financial/asset-related misconduct. 4. Absconding, where company policy permits a rehire restriction. 5. Serious policy violation resulting in a documented termination/restriction. 6. Any other HR-approved rehire restriction category. **Each criterion should be configurable rather than hard-coded.**
Cross-Company Restriction	**All Company Check**	1. Before creating a new employee ID, the system should search the **central employee database**. 2. The search should cover both companies. 3. If the person is found in the blacklist, the registration should be blocked or placed **On Hold**. 4. The HR user should receive a message such as **"Candidate is restricted from rehire – HR authorization required."** 5. The previous company should not be able to bypass the restriction by creating another Employee ID.
Contractor Employee Check	**Contractor-to-Company Movement**	1. Contractor employees should also be checked against the blacklist/restriction database. 2. A person previously employed through a contractor should not bypass the restriction by joining as a direct employee. 3. Similarly, a restricted direct employee should not bypass the restriction by joining through another contractor. 4. Contractor records should therefore be linked to the central identity/employee record where permitted.
Registration Blocking	**System Control**	1. Blacklist check should happen **before Employee Unique ID generation**. 2. If a match is confirmed, the system should prevent automatic Employee ID generation. 3. Biometric registration should also be blocked until the restriction is resolved. 4. Attendance and payroll records should not be created for a blocked employee unless authorized.

Title	Key Points	Description
Potential Match	**Manual Verification**	1. The system should distinguish between **Confirmed Match** and **Potential Match**. 2. A partial name/DOB match should not automatically blacklist the person. 3. Potential matches should be sent to HR/HO TEAM for manual verification. 4. HR should be able to mark the result as **Confirmed Match / False Positive / Requires More Information**.
Blacklist Approval	**Authorization**	1. HR should not be able to permanently blacklist an employee without the required authorization. 2. The system should support an approval workflow such as **HR → HO TEAM/Authorized Management**. 3. Blacklist reason and supporting documentation should be mandatory. 4. The approver, approval date and remarks should be recorded.
Blacklist Duration	**Permanent / Temporary**	1. Restriction should support **Permanent** or **Time-Bound** status. 2. For time-bound restrictions, configure **Start Date and End Date**. 3. After the expiry date, the restriction should automatically become inactive, subject to company policy. 4. Permanent restrictions should require authorized removal.
Blacklist Status	**Status Management**	Recommended statuses: **Active – Restricted / Temporary Restricted / Under Review / Cleared / Expired / Cancelled**. 5. Only **Active – Restricted** records should block new employment.
Rehire Exception	**Authorized Override**	1. If management decides to rehire a restricted employee, the system should support an **Exception / Rehire Approval** process. 2. Exception approval should require authorized management approval. 3. Reason for override should be mandatory.

Title	Key Points	Description
		4. The original blacklist record should remain in history; it should not simply be deleted. 5. The system should record who authorized the rehire.
Audit Trail	**Complete History**	1. Maintain complete history of blacklist creation, modification, approval, clearance and rehire. 2. Record **Employee/Candidate, Company, Reason, Supporting Document, Created By, Approved By, Date and Status**. 3. Blacklist records should not be physically deleted by normal HR users. 4. All overrides must be auditable.

Asset Configuration & Allocation

Title	Key Points	Description
Asset Configuration	**Asset Master**	1. The system should provide an **Asset Master** for configuring all company assets. 2. Each asset should have a unique **Asset Code/Asset ID**. 3. Assets should be categorized, e.g. **Laptop, Mobile, ID Card, Uniform, Tools, Safety Equipment, Vehicle, Accessories, etc.** 4. Asset configuration should include **Company, Location/Site, Asset Category, Asset Type and Status**. 5. Asset may be configured as **Returnable / Non-Returnable**. 6. Asset value/cost should be maintained where required. 7. Asset status should include **Available / Allocated / Returned / Damaged / Lost / Under Repair / Retired**.
Returnable Asset	**Asset Return Rule**	1. Returnable assets must be returned by the employee when the asset is no longer required, on transfer, resignation or termination, as applicable. 2. The system should identify whether an asset is **Returnable = Yes/No**. 3. Returnable assets should remain linked to the employee until formally returned. 4. The system should prevent the asset from being allocated to another employee while it is still allocated to the current employee. 5. Return date and return condition should be recorded.

Title	Key Points	Description
Asset Fine Configuration	**Fine Master**	1. The system should provide a separate **Fine/Penalty Configuration**. 2. Fine rules should be configurable for each asset category/type. 3. The fine amount should be configured **before the asset is allocated**. 4. Fine can be configured as a **Fixed Amount or Percentage of Asset Value**, if required. 5. Fine reason should be configurable, e.g. **Not Returned, Lost, Damaged, Partial Damage, Missing Accessories, etc.** 6. Fine rules should have an **Effective From Date** and Status.
Fine Rules	**Condition-Based Fine**	1. Different fine amounts may apply depending on the asset condition. 2. Example: • Asset Not Returned → ₹X • Asset Lost → ₹X / Asset Value • Asset Damaged → ₹X • Accessories Missing → ₹X 3. Fine rules should be configurable by **Company + Asset Category + Asset Type**. 4. Maximum fine amount should be configurable where required. 5. The system should prevent unauthorized manual changes to configured fine amounts.
Asset Allocation	**Employee Mapping**	1. Asset should be allocated against the **Employee Unique ID**. 2. Allocation should capture **Employee, Company, Location, Asset ID, Asset Type, Allocation Date and Allocated By**. 3. Asset serial number/IMEI/identification number should be captured where applicable. 4. Employee acknowledgement/acceptance should be recorded. 5. Asset allocation history should be maintained.
Asset Handover	**Employee Acknowledgement**	1. Employee should acknowledge receipt of the asset. 2. Handover date and time should be recorded. 3. Asset condition at the time of allocation should be recorded. 4. Accessories issued with the asset should also be

Title	Key Points	Description
		recorded. 5. Digital acknowledgement/signature may be supported.
Asset Return	**Return Processing**	1. Employee must return the asset when required. 2. Return date should be captured. 3. Asset condition should be recorded at return. 4. Returned accessories should be checked against the original allocation. 5. The asset should be marked **Returned/Available** after successful verification. 6. If the asset is damaged, lost or incomplete, the applicable fine rule should be triggered.
Asset Fine Assessment	**Fine Calculation**	1. On asset return, HR/Admin should assess the asset condition. 2. System should identify the applicable fine rule automatically. 3. The calculated fine should be displayed before confirmation. 4. Authorized users may approve/override the fine where policy permits. 5. Any override must require a reason and approval. 6. The final fine amount should be passed to Payroll for deduction where applicable.
Employee Exit	**Asset Clearance**	1. Asset clearance should be part of the employee exit process. 2. The system should list all assets currently allocated to the employee. 3. All returnable assets must be returned or appropriately closed before final clearance. 4. Outstanding asset fines should be identified during Full & Final Settlement. 5. Approved fines can be deducted from the employee's final settlement according to company policy.
Asset Transfer	**Employee / Location Transfer**	1. Assets can be transferred from one employee to another through an authorized process. 2. Asset transfer between locations/sites should be supported. 3. Previous allocation history must be retained. 4. New employee acknowledgement should be captured after transfer.

Title	Key Points	Description
Asset Loss / Damage	**Exception Handling**	1. Employee/Admin should be able to report an asset as **Lost/Damaged**. 2. Supporting documents or remarks may be required. 3. System should calculate the applicable fine based on the configured rule. 4. Approval should be required for loss/damage cases. 5. Asset status should be updated accordingly.
Asset Fine Approval	**Authorization**	1. Fine assessment should be reviewed by the authorized HR/Admin/HO TEAM user. 2. Fine should have statuses such as **Pending / Approved / Waived / Rejected / Recovered**. 3. Waiver of a configured fine should require authorization. 4. Fine approval history should be maintained.
Payroll Integration	**Fine Deduction**	1. Approved asset fines should be integrated with Payroll. 2. The deduction should appear separately in the payroll deduction section. 3. Fine deduction can be made from regular salary or Full & Final Settlement, based on policy. 4. Payroll should receive only **approved and finalized fines**. 5. Fine recovery status should be maintained.
Asset Audit	**Asset History**	1. The system should maintain complete asset history from **Purchase/Creation → Allocation → Transfer → Return → Fine → Retirement**. 2. Audit should record who allocated, transferred, returned, assessed and approved the asset. 3. Asset and fine records should not be deleted once used in transactions.

Recommended Asset Configuration

I would keep these fields in the **Asset Master**:

Attendance

Title	Key Points	Description
Shift Configuration	**Shift Master**	1. The system should provide a centralized **Shift Master** for creating and managing shifts. 2. Each shift should have a unique **Shift Code** and **Shift Name** 3. Shift should be defined based on **Company and Category** 4. The following parameters should be configurable: a. Company b. Category c. Shift Code

		d. Shift Name e. Shift Start Time f. Shift End Time g. Working Hours h. Break Hours / Break Duration i. OT Applicable j. OT Criteria / OT Calculation Rule k. Grace Period l. Late Mark Criteria m. Early-Out Criteria n. Weekly Off o. Status – Active / Inactive 5. The system should support **day shifts and night/overnight shifts**. 6. Shift timing should support shifts crossing midnight. 7. Changes to an existing shift should not affect historical attendance records.
Employee & Shift Mapping	**Employee Shift Assignment**	1. **Only one active shift** can be mapped to an employee at a particular point in time. 2. Each employee must be mapped to a shift based on applicable **Company and Category**. 3. Shift mapping should include an **Effective From Date**. 4. If the employee's shift changes, the previous mapping should be closed/retained in history, and the new shift should become active from the effective date. 5. The system should not allow overlapping active shift assignments for the same employee. 6. Shift assignment should be applicable to the employee's **Location / Department**, where required. 7. Shift assignment should determine the employee's expected **Start Time, End Time, Working Hours, Grace Period and OT eligibility**. 8. Shift mapping changes should be recorded in the **audit trail**. 9. Authorized HR/HO TEAM users should be able to assign or change an employee's shift.
Shift Rules	**Attendance Calculation Rules**	1. Grace Period should be configurable in minutes. 2. Late arrival should be calculated based on the configured shift start time and grace period. 3. Early departure should be calculated based on the configured shift end time and applicable rule. 4. OT should be calculated only when **OT Applicable = Yes**. 5. Minimum OT duration and OT rounding rules should be configurable, if required. 6. Break duration should be considered while calculating working hours, where applicable. 7. Rules should support **full day, half day, late, early-out and absent** calculations.
Weekly Off & Holidays	**Non-Working Days**	1. Weekly off should be configurable for each shift/category. 2. The system should support different weekly-off patterns, such as **Sunday, Saturday/Sunday, alternate Saturday, rotational off**, etc., if required. 3. Holiday handling should be configurable separately from the shift.

		4. Attendance on weekly off/holiday should be considered for **OT or holiday working**, based on configured rules.
Shift Category	**Employee Classification**	1. Shift categories should be configurable based on business requirements. 2. Category may determine **shift timing, working hours, OT eligibility, grace period and weekly off**. 3. The system should allow different shift rules for different employee categories. 4. The system should validate that the employee's assigned category is eligible for the selected shift.
Shift Status	**Active / Inactive**	1. Shift should have an **Active / Inactive** status. 2. Inactive shifts should not be available for new employee mapping. 3. Existing historical mappings and attendance records should remain available even if a shift becomes inactive. 4. A shift should not be deleted if it has already been used in employee/attendance records; it should instead be marked **Inactive**.
Shift Change / History	**Shift Assignment History**	1. The system should maintain complete shift assignment history for every employee. 2. History should include **Employee, Previous Shift, New Shift, Effective Date, Changed By and Change Date**. 3. Future-dated shift changes should be supported, if required. 4. Attendance calculation should use the shift that was applicable on the attendance date.
Shift Validation	**System Validation**	1. Shift Code must be unique within the applicable company. 2. Start Time and End Time must be validated. 3. Working Hours should be consistent with shift timings and break duration, where applicable. 4. OT cannot be enabled without the required OT rule/configuration. 5. Employee cannot have more than one active shift for the same effective period. 6. Company and Category must be selected before the shift can be activated.

Site Shutdown

Title	Key Points	Description
Prior Intimation	**Shutdown Intimation by Manager / Supervisor**	1. If the Manager/Supervisor is aware of a planned site shutdown, he/she will raise a **Shutdown Intimation Request** to the HO TEAM. 2. The request should include **Company, Site/Location, Shutdown Date, Expected Shutdown Time, Reason and Number of Employees Expected to Work**, if known. 3. HO TEAM will review the request based on the applicable **Site/Location**.

Title	Key Points	Description
		4. If the Manager/Supervisor is aware of the employees who will work during the shutdown, he/she should provide the **employee count/list** along with the request. 5. If the employee details are not available in advance, the request can be submitted without the employee list. 6. During attendance compliance, HO TEAM will review the **actual biometric attendance/punch data** against the shutdown intimation. 7. HO TEAM can **Approve / Reject / Return for Correction** based on the available inputs. 8. Any rejection should include a **reason**. 9. The system should maintain the complete history of **shutdown requests, approvals, rejections, modifications and cancellations**. 10. The system should allow configuration of a **minimum prior-intimation period** for Site Shutdown requests, e.g. **24 / 48 / 72 hours before the shutdown**. 11. If the request is submitted after the configured prior-intimation period, the system should identify it as **Late Intimation**. 12. Late Intimation should require **additional HO TEAM/authorized approval** before the shutdown can be processed. 13. For emergency shut down situations, the system should provide an **Emergency Shutdown** option with mandatory reason/remarks. 14. The system should record the **request submission date/time** to verify whether the required prior-intimation period was followed. 15. The system should provide a notification/reminder to the HO TEAM for **pending shutdown requests** before the shutdown date/time.
Site Shutdown	**Approved Site Shutdown**	1. Site Shutdown should be created against a specific **Company + Site/Location**. 2. Shutdown should have a defined **Start Date/Time and End Date/Time**.

Title	Key Points	Description
		3. The system should maintain shutdown status as **Pending / Approved / Rejected / Cancelled / Completed**. 4. Only an **Approved** shutdown should be considered by the Attendance Processing Engine. 5. Shutdown should apply only to employees mapped to the applicable **Company and Site/Location**. 6. The system should maintain **Shutdown ID, Company, Site, Date/Time, Reason, Requester, Approver and Status**. 7. An approved shutdown should trigger the applicable **Biometric Device Shutdown Mapping**.
Biometric Mapping	**Device → Company → Site → Shutdown Mapping**	1. Each biometric device should have a unique **Device ID**. 2. Each biometric device must be mapped to a specific **Company + Site/Location**. 3. Device status should include **Active / Shutdown / Inactive**. 4. After Site Shutdown approval, the applicable biometric device(s) should be marked as **Shutdown**. 5. Shutdown can apply to **one device, multiple devices or all devices** mapped to the site. 6. The system should capture **Shutdown Start Date/Time and End Date/Time** for each biometric device. 7. If a biometric device is moved to another site, its Company/Site mapping must be updated before attendance processing. 8. Historical device mapping and shutdown history should be retained for audit and attendance reconciliation. 9. The system should not allow a biometric device belonging to another site/company to be included in the shutdown.
Biometric Integration	**Attendance Data Integration**	1. Biometric devices will send employee punch data to the central system.

Title	Key Points	Description
		2. Each transaction should identify **Device ID, Employee ID and Punch Date/Time**, along with the applicable Company/Site mapping where available. 3. The system should identify the site associated with the punch through the biometric device mapping. 4. If the biometric device is marked as **Shutdown**, punches received during the shutdown period should be identified accordingly. 5. Duplicate punches should be identified and handled appropriately. 6. Delayed punches caused by network/connectivity issues should be processed using the **actual punch date/time**, not synchronization time. 7. Failed integration transactions should be logged and made available for reprocessing. 8. **Integration failure must not automatically be treated as Site Shutdown.**
Shutdown Attendance Processing	**Attendance Calculation**	1. The Attendance Engine should check whether an **approved Site Shutdown** exists for the employee's Company + Site + attendance date/time. 2. If the biometric device/site is marked as Shutdown and there is **no punch**, the employee should not be marked **Absent** solely because of the shutdown. 3. Attendance status should be marked as **Site Shutdown**. 4. If a valid biometric punch is received during the shutdown period, the employee should be identified as **Worked During Shutdown**. 5. Working hours should be calculated based on valid punches. 6. OT should be calculated according to the applicable **OT policy and approval rules**. 7. Shutdown status should take precedence over normal **Absent / Missing Punch** processing for the applicable period.

Title	Key Points	Description
Employee Applicability	**Company / Site / Category**	1. Shutdown applicability should primarily be determined by **Company + Site/Location**. 2. Employee Category may be considered where different categories have different shutdown rules. 3. Contractor employees should also be considered based on their **Company/Site/Contractor mapping**. 4. If only selected employees are required to work during shutdown, the employee list provided by the Manager/Supervisor should be considered. 5. Employees not covered by the shutdown should continue to be processed according to their normal attendance rules.
Employee Working During Shutdown	**Expected Employee vs Actual Attendance**	1. Employees who are expected to work during shutdown should be identified through the Manager/Supervisor's prior intimation, where available. 2. The system should compare the **Expected Employee List** against actual biometric punches. 3. **Expected Employee + Punch Available** → Worked During Shutdown. 4. **Expected Employee + No Punch** → Exception for Compliance. 5. **Not Expected Employee + Punch Available** → Unexpected Punch / Exception. 6. HO TEAM should review and approve/reject such exceptions. 7. Final approved status should be passed to the Attendance module.
Exception Handling	**Punch During Shutdown**	1. Any punch received during an approved shutdown should be evaluated against the shutdown employee list/intimation. 2. **Listed + Punch Available** → Process as **Worked During Shutdown**. 3. **Listed + No Punch** → Flag for attendance compliance. 4. **Not Listed + Punch Available** → Flag as **Unexpected Punch** for HO TEAM/HR review.

Title	Key Points	Description
		5. HO TEAM/HR should be able to **Approve / Reject / Regularize** the exception. 6. Any manual regularization must include a **reason**. 7. All decisions must be recorded in the **audit trail**.
Attendance Compliance	**HO TEAM Review**	1. HO TEAM should have a shutdown compliance view showing **Expected Employees, Actual Employees Worked, Missing Punches and Unexpected Punches**. 2. HO TEAM should review biometric data before final attendance processing. 3. HO TEAM can approve/reject exceptions based on the Manager/Supervisor's intimation and actual biometric records. 4. Once approved, the final status should be passed to the Attendance module. 5. Attendance compliance should be completed before **Payroll Finalization**.
Reconciliation	**Intimation vs Biometric vs Attendance**	1. The system should reconcile three data points: **Manager/Supervisor Intimation → Biometric Punches → Final Attendance**. 2. The system should highlight mismatches. 3. Reconciliation should identify: • Employees expected to work but without punches • Employees who punched but were not listed • Duplicate punches • Missing biometric transactions • Incorrect site/device mapping • Approved shutdown but unexpected attendance 4. **Biometric Integration Failure** and **Actual Site Shutdown** must remain separate statuses.5. HO TEAM should be able to review and resolve reconciliation exceptions.

Title	Key Points	Description
Shutdown Cancellation / Extension	**Shutdown Period Control**	1. An approved shutdown can be **Cancelled / Extended / Modified** by an authorized user. 2. If cancelled, the applicable biometric device should return to **Active** status from the effective date/time. 3. If extended, the biometric device should remain in **Shutdown** status for the extended period. 4. Changes after attendance processing should require appropriate authorization. 5. All changes should be recorded in the audit trail.
Audit Trail	**Complete Shutdown History**	1. The system should maintain the complete lifecycle of the shutdown request. 2. Record **Requested By, Request Date/Time, HO TEAM, Approval Date/Time, Approval Status, Modification, Cancellation and Reason**. 3. Maintain the employee list/intimation submitted by the Manager/Supervisor. 4. Maintain biometric device shutdown history separately. 5. Maintain actual biometric transactions separately from the final attendance result. 6. Any manual override must record **User, Date/Time, Reason and Previous/Updated Status**.

Leave Policy:

Title	Key Points	Description
Leave Policy Configuration	Company-wise and Employee Category-wise	All leave policies shall be configurable based on **Company and Employee Category**. The system shall support multiple resource categories, including **Ground Staff, HO/Corporate Staff, Manager, Supervisor, Contract Staff, Temporary Staff, Trainee and other configured categories**.
Policy Master	Company, Category, Employee Type, Role, Location	The system shall provide a configurable Leave Policy Master. The policy shall primarily be applicable based on **Company + Employee Category**, with additional configuration based on Employee Type, Role/Designation, Grade, Location/Site and

Title	Key Points	Description
		other applicable criteria. Different policies may be configured for Ground Staff and other resource categories.
Multiple Resource Categories	Ground Staff and other resources	The system shall support separate leave policies for different resource categories. For example, Ground Staff may have a different leave entitlement, eligibility, approval process or calculation rule compared with HO Staff or Management.
Policy Status & Version	Active/Inactive, Effective Date	Each policy shall have Active/Inactive status and Effective From/To dates. Changes shall create a new version while retaining historical policy information.

Leave Entitlement

Title	Key Points	Description
Default Leave Allocation	1.5 days/month, configurable maximum	Default leave entitlement shall be configurable. As per the current requirement, **1.5 days of leave shall be credited month-wise**, with **Maximum Days configurable and defaulted to 19 days**, subject to applicable Company and Employee Category policy.
Category-wise Leave Allocation	Ground Staff-specific configuration	The system shall allow different monthly leave credits for different categories. For example, the Ground Staff category may be configured with 1.5 days/month while another category may have a different entitlement.
Monthly Credit	Automated monthly processing	Eligible employees shall receive leave credit automatically every month based on their applicable Company + Employee Category policy.
Eligibility-Based Credit	Employment status and policy	Leave credit shall be provided only when the employee satisfies the applicable eligibility conditions. The system shall consider joining date, probation, confirmation, employee status, category and policy.
Leave Ledger	Credit/debit history	Every leave credit, debit, adjustment, reversal and expiry shall be maintained in the employee-wise leave ledger.

Leave Allocation After Confirmation

Title	Key Points	Description
Confirmation-Based Eligibility	Confirmation-driven allocation	Where configured, regular leave allocation shall start after employee confirmation. This rule shall apply independently to each Employee Category.
Ground Staff Confirmation Rule	Category-specific configuration	The system shall allow a separate confirmation-based leave rule for **Ground Staff**. The rule may differ from HO Staff, Management or other categories.
Probation Status	Probation/Confirmed	The system shall identify Probation, Confirmed and other employment statuses from the Employee Master.
First Leave Credit After Confirmation	Configurable calculation	Once an employee is confirmed, the first eligible leave credit shall be calculated based on the configured Company + Category policy and Confirmation Date.
Manual Adjustment	Authorized HR/HO Team	Authorized HR/HO Team users may adjust leave allocation where required, with mandatory reason and audit trail.

Probation Period

Title	Key Points	Description
Probation Period	Category-wise probation rules	Probation duration and leave eligibility shall be configurable based on Company, Employee Category, Employee Type, Role/Designation or other applicable criteria.
Ground Staff Probation	Separate Ground Staff rule	The system shall support a specific probation and leave rule for Ground Staff where their probation conditions differ from other employee categories.
Leave Restriction During Probation	Leave-type-wise control	Leave eligibility during probation shall be configurable separately for each leave type.
Blocked Leave	System validation	If a particular leave type is not permitted during probation, the system shall prevent application and display the applicable reason.
Allowed Leave	Category/leave-type based	Certain leave types may be permitted during probation even when regular leave allocation is restricted. Such rules shall be configurable.

Notice Period

Title	Key Points	Description
Notice Period Configuration	Company/category/role based	Notice period shall be configurable based on Company, Employee Category, Employee Type, Role/Designation or Grade.
Ground Staff Notice Period	Separate category rule	Ground Staff may have a different notice-period rule from HO Staff, Supervisors, Managers or other categories. The system shall support such category-specific configuration.
Notice Period Start	Resignation-based	The system shall identify the Notice Period Start Date and Expected Last Working Date after resignation is formally recorded.
Leave During Notice Period	Configurable restriction	Leave availability during notice period shall be configurable by Company, Employee Category and Leave Type.
Blocked Leave During Notice	Validation	Where leave is not permitted, the system shall prevent submission and display the applicable policy reason.
Exception Approval	Authorized HR/HO Team	Exceptions shall be permitted only to authorized HR/HO Team users and shall require reason and audit trail.

Role-Based Notice Period

Title	Key Points	Description
Notice Period by Category	Ground Staff, HO, Management etc.	Notice period shall primarily support Employee Category-wise configuration, allowing Ground Staff and other resource categories to have separate rules.
Notice Period by Role	Designation/Grade	Further differentiation may be configured by Role, Designation or Grade.
Example Configuration	Configurable values	Example: **Ground Staff – 30 Days, Supervisor – 45 Days, Manager – 60 Days, Senior Management – 90 Days**. Actual values shall be configurable by HR/HO Team.
Automatic Rule Selection	Effective employee mapping	The system shall automatically determine the applicable notice period based on the employee's Company, Category and applicable Role/Designation at the time of resignation.

Title	Key Points	Description
Historical Rule	Effective-date control	Changes to notice-period rules shall not alter previously processed employee records.

Leave Application Validation

Title	Key Points	Description
System Controls	Multi-level eligibility validation	Before submission, the system shall validate the employee against the applicable **Company + Employee Category + Employee Type + Leave Type + Location/Site + Probation/Confirmation + Notice Period** rules.
Ground Staff Validation	Category-specific leave rules	Ground Staff leave applications shall be validated against the leave policy configured specifically for the Ground Staff category.
Leave Balance	Available balance check	The system shall verify whether sufficient leave balance is available.
Eligibility Period	Joining/confirmation/probation/notice	Leave dates shall be validated against the employee's eligible employment period.
Policy Restriction	Prevent invalid applications	If leave is not permitted under the applicable policy, submission shall be blocked.
Reason for Block	User-friendly message	The system shall display a clear reason, such as **"Leave is not applicable during probation for Ground Staff"** or **"Leave is restricted during the notice period as per applicable policy."**

Leave Balance

Title	Key Points	Description
Credit / Debit / Balance	Employee and leave-type wise	Leave balance shall be maintained separately for each employee and leave type.
Category-wise Policy	Applicable entitlement	The balance shall be calculated using the policy applicable to the employee's Company and Employee Category.

Title	Key Points	Description
Monthly Credit	Automated transaction	Each monthly credit shall be recorded separately.
Leave Debit	Approved leave only	Approved leave shall reduce the available balance. Rejected or cancelled leave shall not reduce the balance.
Balance Formula	Opening + Credit – Availed	**Available Balance = Opening Balance + Eligible Credits – Approved Leave Availed ± Adjustments**.
Adjustment	Authorized correction	Authorized HR/HO Team users may adjust balances with mandatory reason and audit history.

Leave Approval

Title	Key Points	Description
Approval Workflow	Category-aware workflow	Leave approval workflow shall support different approval structures for Ground Staff, HO Staff, Managers, Contract Staff and other categories.
Ground Staff Approval	Supervisor/Manager + HO Team	Ground Staff leave applications may be routed to the applicable **Reporting Supervisor/Manager and HO Team**, as per the standard leave-routing requirement.
HO Team Visibility	Central visibility	All leave applications shall remain visible to the HO Team irrespective of employee category.
Actions	Approve/Reject/Return	Approver shall be able to Approve, Reject or Return an application for correction.
Rejection Reason	Mandatory reason	Rejection shall require an appropriate reason.
Approval History	Complete audit	All approval actions shall be recorded with user, date/time, action and remarks.

Leave Types

Title	Key Points	Description
Leave Category	Configurable leave types	Leave types such as **CL, SL, PL/EL and other company-defined leave types** shall be configurable.
Category-wise Applicability	Ground Staff-specific applicability	Each leave type shall be configurable for applicability to Ground Staff and other employee categories.

Title	Key Points	Description
Entitlement	Leave-type-specific	Entitlement, credit frequency and maximum balance shall be configurable by Company + Employee Category + Leave Type.
Probation Applicability	Leave-type-wise	Each leave type can be configured as Allowed/Not Allowed during probation.
Confirmation Applicability	Confirmation-based	Each leave type can have separate confirmation eligibility rules.
Notice Period Applicability	Notice-period control	Each leave type can independently be Allowed/Not Allowed during notice period.
Partial Leave	Half-day/partial day	Half-day or other partial-day leave rules shall be configurable where applicable.

Leave Carry Forward

Title	Key Points	Description
Year-End Processing	Category and leave-type based	Carry-forward rules shall be configurable by Company, Employee Category and Leave Type. **Default Zero**
Ground Staff Carry Forward	Independent rule	Ground Staff may have a different carry-forward rule from other categories. **Default Zero**
Maximum Carry Forward	Configurable limit	Maximum carry-forward days shall be configurable. **Default Zero**
Non-Carry Forward	Independent option	A leave type may be configured as **Carry Forward Applicable** or **Not Applicable**.
Expiry	Configurable	Carry-forward leave may have an expiry period as defined by policy.

Leave Encashment

Title	Key Points	Description
Optional Policy	Independent applicability	Leave encashment shall be independently configurable from carry forward. **Default Zero**
Category-wise Encashment	Ground Staff-specific rule	Encashment may be applicable to Ground Staff and not applicable to another category, or vice versa. **Default Zero**

Title	Key Points	Description
Eligibility	Policy based	Eligibility, maximum days and qualifying conditions shall be configurable. **Default Zero**
Calculation Basis	Configurable	Encashment calculation basis shall be configurable according to Company policy. **Default Zero**
Payroll Integration	Payroll/F&F	Approved encashment shall be passed to Payroll or Full & Final Settlement where applicable.

Leave Calendar

Title	Key Points	Description
Holiday / Weekly Off	Location/site aware	Leave calculation shall consider Company, Location/Site, declared holidays and weekly-off rules.
Ground Staff Location	Site-specific calendar	Since Ground Staff may work at different sites/locations, the applicable holiday calendar shall be determined based on the employee's effective location/site.
Weekly Off	Category/shift aware	Weekly-off rules may differ based on Ground Staff working patterns, shift or applicable category policy.
Holiday Inclusion	Configurable	Whether holidays and weekly offs are included or excluded from leave duration shall be configurable by policy.

Audit & History

Title	Key Points	Description
Transaction History	Complete leave ledger	All leave credits, debits, adjustments, approvals, cancellations, carry-forward and encashment transactions shall be retained.
Policy History	Version control	Historical versions of Company + Category-specific policies shall be maintained.
Ground Staff History	Category-specific audit	Changes to Ground Staff leave policies shall be separately traceable without affecting historical transactions.
User Audit	Created/Modified/Approved By	The system shall record Created By, Created Date/Time, Modified By, Modified Date/Time, Approved By and Approval Date/Time.

Title	Key Points	Description
Before/After Values	Change tracking	For important policy and balance changes, the system shall maintain old value, new value and reason for change.

Key BRD Principle

Leave Policy shall be configured primarily on Company + Employee Category basis, with additional rules based on Employee Type, Role/Designation, Grade, Location/Site, Probation, Confirmation and Notice Period. The system shall support separate policies for Ground Staff and other resources, ensuring that different resource groups can have different leave entitlement, calculation, eligibility, approval and carry-forward/encashment rules without requiring separate systems or manual processing.

Holiday List Creation & Configuration

Title	Key Points	Description
Holiday Configuration	Company + Location/Site-wise	The system shall provide centralized Holiday Management where holiday calendars are configured primarily based on **Company and Location/Site**. This shall support different holiday calendars for different operational locations, including locations where Ground Staff and other resources are deployed.
Centralized Holiday Management	HR/Admin controlled	HR/Admin shall be able to create, configure, finalize, modify and manage holiday calendars for each Company and applicable Location/Site.
Resource Applicability	Ground Staff and other resources	The holiday calendar shall apply to all eligible resources mapped to the applicable Company + Location, including **Ground Staff, HO Staff, Supervisors, Managers, Contract Staff and other configured employee categories**, unless an additional category-specific rule is configured.

Company

Title	Key Points	Description
Company-wise Holiday List	Company-specific calendar	HR/Admin shall select the Company for which the holiday calendar is being created. Each Company shall maintain its own holiday calendar.
Company Separation	Independent configuration	Holidays configured for one Company shall not automatically apply to another Company.

Title	Key Points	Description
Company Transfer	Effective company mapping	Where an employee transfers between Companies, holiday applicability shall be determined using the employee's effective Company assignment for the applicable date.

Location / Site

Title	Key Points	Description
Location / Site Applicability	Primary holiday scope	Holiday applicability shall be controlled based on **Location/Site within the selected Company**.
Multiple Locations	One or more locations	A holiday may be assigned to one, multiple or all locations within the selected Company.
Ground Staff Location	Operational-site based	For Ground Staff and other site-based resources, the applicable holiday shall be determined based on the employee's effective Location/Site assignment for the holiday date.
Different Site Calendars	Location-specific holidays	Different locations under the same Company may have different holiday calendars.

Holiday Year

Title	Key Points	Description
Holiday Year	Calendar year	A separate holiday calendar shall be maintained for each holiday year, such as 2026, 2027, etc.
Year-wise Processing	Independent annual calendar	Holiday records for one year shall not automatically affect another year.
Previous Year History	Historical records	Previous-year holiday calendars shall remain available for historical attendance, leave and reporting purposes.

Holiday List Master

Title	Key Points	Description
Holiday List Name	Calendar identification	HR/Admin shall define a name such as **"Company A – Mumbai Holiday Calendar 2027"** or **"Company A – Pune Site Holidays 2027"**.
Holiday Code	Unique identification	Each holiday shall have a unique Holiday Code, such as HOL001, HOL002, etc.

Title	Key Points	Description
Holiday Name	Official holiday name	The official name of the holiday shall be maintained.
Holiday Date	Applicable date	The date on which the holiday is applicable shall be captured.
Day	Auto-calculated	The system shall automatically calculate and display the day of the week based on the Holiday Date.
Holiday Type	Fixed / Declared	Holiday Type shall support configured values such as Fixed or Declared. **Optional Holiday shall not be available.**
Holiday Category	National/Festival/Company/Other	Holiday Category shall be configurable for administrative and reporting purposes.
Holiday Status	Active/Inactive	Only Active holidays shall be considered by Attendance and Leave processing. Historical records shall not be deleted.

Applicability

Title	Key Points	Description
Applicable Company	Mandatory Company mapping	Every holiday shall be associated with one specific Company.
Applicable Locations	Location mapping	Each holiday shall be mapped to one, multiple or all Locations/Sites under the selected Company.
All Locations	Company-wide applicability	HR/Admin may select **All Locations** when the holiday applies across the entire Company.
Specific Locations	Selected-site applicability	If All Locations is not selected, HR/Admin shall be able to select specific Locations/Sites.
Employee Category Applicability	Optional additional scope	Where required by business policy, applicability may additionally be configured by Employee Category, Employee Type or other resource classification.
Ground Staff Applicability	Site-based by default	Ground Staff shall normally inherit the holiday calendar of their assigned Location/Site. Category-specific exceptions may be configured where required.

Holiday Working

Title	Key Points	Description
Holiday Working Rule	Working on declared holiday	The system shall support configuration of whether employees/resources are permitted or expected to work on a declared holiday.
Ground Staff Holiday Working	Operational requirement	Since Ground Staff may be required to work on holidays due to operational requirements, the system shall support recording and processing of such attendance.
Attendance Recognition	Holiday + Punch	If an employee has valid attendance on a declared holiday, the system shall identify the employee as **Worked on Holiday**.
OT Integration	Conditional OT	Holiday working may generate OT according to the applicable OT policy.
Comp-Off Integration	Conditional Comp-Off	Holiday working may generate Comp-Off according to the configured Company/Category policy.

Leave During Holiday

Title	Key Points	Description
Holiday Exclusion	Leave calculation	Where an approved leave period includes a declared holiday, the holiday shall normally be excluded from leave deduction according to the applicable Leave Policy.
Location-based Validation	Effective location	The system shall determine whether the date is a holiday based on the employee's Company + effective Location/Site.
Category Rule	Additional applicability	If a holiday has a category-specific rule, the system shall consider the employee's applicable category before calculating leave days.

Attendance Integration

Title	Key Points	Description
Attendance Treatment	Holiday status	Employees assigned to the applicable Company + Location shall receive **Holiday** status for the configured date when no working attendance or approved exception applies.
Holiday Working	Valid punch	A valid punch on a holiday shall be identified as **Worked on Holiday** rather than normal Present.

Title	Key Points	Description
No Punch	Holiday	An employee shall not be marked Absent merely because there is no punch on an applicable holiday.
Exception Handling	Special cases	Attendance exceptions shall be processed according to the configured Attendance and Regularization rules.
Biometric Integration	Punch validation	Biometric transactions shall be evaluated against the employee's Company, Location/Site and applicable holiday calendar.

Shift Integration

Title	Key Points	Description
Shift-wise Attendance	Shift-aware processing	Holiday validation shall consider the employee's assigned shift.
Overnight Shift	Cross-day processing	Overnight shifts crossing midnight shall be handled according to the Attendance Engine's shift-date rules.
Shift Transfer	Effective assignment	The shift applicable to the employee on the relevant date shall be considered for attendance processing.

Weekly Off Conflict

Title	Key Points	Description
Holiday + Weekly Off	Policy-based treatment	If a holiday falls on an employee's weekly off, the system shall follow the configured Company/Category policy.
No Automatic Leave Deduction	Leave protection	A holiday coinciding with a weekly off shall not automatically result in leave deduction.
Ground Staff Weekly Off	Shift/roster based	Where Ground Staff have roster-based or category-specific weekly offs, the applicable weekly-off rule shall be considered.

Employee Location Transfer

Title	Key Points	Description
Location Transfer	Effective-date based	Holiday applicability shall be determined based on the employee's effective Location/Site assignment on the holiday date.

Title	Key Points	Description
Transfer Before Holiday	New location	If an employee transfers to another location before the holiday effective date, the holiday calendar of the new location shall apply.
Transfer After Holiday	Previous location	If the transfer becomes effective after the holiday, the previous location's holiday calendar shall apply to that date.
Historical Accuracy	No retrospective impact	Later location transfers shall not change historical holiday or attendance calculations.

Duplicate Validation

Title	Key Points	Description
Duplicate Holiday Validation	Company + Location + Date	The system shall prevent duplicate holiday entries for the same **Company + Location + Holiday Date**.
All Location Conflict	Duplicate prevention	If a holiday is already marked as applicable to All Locations, the system shall prevent creation of a duplicate location-specific entry for the same Company and Date unless explicitly handled through an authorized exception rule.

Holiday List Management

Title	Key Points	Description
Holiday List Copy	Year-to-year copy	HR/Admin shall be able to copy a previous year's holiday calendar into a new year and modify dates, locations and holidays as required.
Bulk Upload	Excel import	Multiple holidays shall be uploadable using a predefined Excel template.
Bulk Assignment	Multiple locations	A holiday may be assigned to multiple locations in a single action.
Calendar View	Monthly/Yearly	The system shall provide a calendar view showing holidays for the selected Company and Location/Site.
Search & Filter	Easy management	Users shall be able to filter by Company, Location, Year, Date, Category, Type and Status.

Holiday Modification & Lock

Title	Key Points	Description
Holiday Modification	Authorized changes	Authorized HR/Admin users may modify holiday records before finalization.
Holiday Cancellation	Deactivation	A holiday may be cancelled/deactivated by an authorized user with a mandatory reason.
Holiday Lock	Finalized calendar	Once the holiday calendar is finalized, changes shall require authorized access.
Post-Finalization Change	Controlled modification	Any post-finalization change shall be logged and should trigger recalculation/impact handling where Attendance, Leave or Payroll has already been processed.

Effective Date & Historical Processing

Title	Key Points	Description
Effective Date	Year/date control	Holiday records shall have an applicable year/date and shall only affect the intended period.
Historical Data Protection	No historical impact	Changes to future holiday calendars shall not alter previous attendance, leave or payroll records.
Policy Versioning	Historical versions	Changes to holiday calendars shall maintain version/history for audit and reference.

Approval & Notification

Title	Key Points	Description
Approval Workflow	HR/HOD/Management	If required, holiday calendars may follow an approval workflow such as **HR → HOD/Management** before finalization.
Approval Status	Draft/Pending/Approved/Rejected/Finalized	The system shall maintain the status of the holiday calendar through its lifecycle.
Notification	Employee communication	Once the holiday calendar is approved/finalized, employees/resources may be notified through the Employee Portal/App, email or configured notification channel.

Title	Key Points	Description
Ground Staff Notification	Site-specific communication	Ground Staff shall receive the holiday calendar applicable to their Company + Location/Site.

Audit Trail

Title	Key Points	Description
Audit Trail	Complete history	The system shall maintain complete history of holiday creation, modification, approval, cancellation and finalization.
User Tracking	Created/Modified/Approved By	Maintain Created By, Created Date/Time, Modified By, Modified Date/Time, Approved By and Approval Date/Time.
Change History	Before/After values	Important changes shall capture previous value, new value, user, date/time and reason.

Optional Holiday

Title	Key Points	Description
Optional Holiday	**Not Applicable**	The system shall **not provide Optional Holiday functionality**. All configured holidays shall be treated as applicable according to their configured **Company + Location/Site mapping**, subject to any authorized additional category-specific applicability rule.

Key BRD Principle

Holiday calendars shall be configured primarily on a Company + Location/Site basis. The applicable holiday for an employee/resource shall be determined using the employee's effective Company and Location/Site on the relevant date. This approach shall support Ground Staff and other site-based resources who may follow different holiday calendars from other locations or corporate/HO resources. Employee Category, Employee Type or other classifications may be used as additional applicability criteria where specifically required by business policy.

Attendance & Leave – Exception / Regularization

Exception / Regularization	Scenario	System Treatment
Missing Punch	Employee forgot to punch IN or OUT	Employee can submit regularization with reason; approval required
Incorrect Punch	Wrong/duplicate punch or punch recorded incorrectly	Allow correction with original punch retained in history
Biometric Failure	Finger/face not recognized or biometric device failure	Allow regularization after verification
Biometric Device Down	Device/network was unavailable	Attendance exception generated; HR/HO TEAM can regularize
Forgot to Punch	Employee was present but did not record attendance	Regularization request with approval
Late Arrival	Employee arrived after shift start time	Apply grace period; beyond grace period mark as Late/exception
Early Departure	Employee leaves before shift end	Calculate early-out and allow regularization where authorized
Wrong Shift	Employee worked under a different shift than assigned	Allow shift correction/temporary shift mapping
Shift Change	Employee's shift was changed but system was not updated	Regularize attendance based on approved shift
Off-Day Working	Employee works on weekly off	Mark as working on weekly off and calculate OT/comp-off according to policy
Holiday Working	Employee works on declared holiday	Calculate attendance and applicable OT/holiday benefit
Site Shutdown	Employee's site was officially shut down	Do not mark employee absent; apply shutdown rule
Worked During Shutdown	Employee worked despite site shutdown	Process biometric punches and calculate working hours/OT as configured
Official Duty	Employee is working outside the normal office/site	Mark attendance as Official Duty instead of absence

Exception / Regularization	Scenario	System Treatment
Business Travel	Employee is travelling for business	Apply travel/official-duty attendance rule
Work From Home	Employee is approved to work from home	Attendance should be treated according to WFH policy
On-Duty (OD)	Employee is assigned work outside normal location	Mark as OD and exclude normal site-punch requirement
Training	Employee is attending approved training	Treat according to training attendance policy
Meeting / Client Visit	Employee is away from site for official work	Allow OD/official attendance
Leave Applied After Absence	Employee was absent and subsequently applies for leave	Attendance should be updated after leave approval
Wrong Leave Type	Employee selected incorrect leave type	Allow correction/reversal by authorized user
Leave Without Balance	Employee applies when insufficient leave balance exists	Block or route for special approval based on policy
Half-Day Attendance	Employee worked partial day	Calculate based on configured working-hour threshold
Half-Day Leave + Attendance	Employee works part of day and takes leave for remaining period	Validate attendance and leave together
Leave + Holiday / Weekly Off	Leave period includes holiday or weekly off	Apply configured holiday/weekly-off treatment
Leave During Probation	Employee applies during probation	Allow/block based on leave policy
Leave During Notice Period	Employee applies after resignation	Allow/block based on notice-period policy
Leave on Joining Date	Leave applied close to joining date	Validate based on employee eligibility and policy
Leave During Exit Period	Leave applied close to last working date	Validate against notice/exit rules

Exception / Regularization	Scenario	System Treatment
Overtime Regularization	Employee worked extra hours, but OT was not captured	Allow OT regularization with approval
OT Without Approval	Employee has punches beyond shift but no approved OT	Flag for review rather than automatically paying OT
Missing OT	Valid OT was worked but not calculated	Allow correction after verification
Overnight Shift	Shift crosses midnight	Attendance should be calculated against the correct shift/date
Cross-Day Punch	IN on one date and OUT on next date	System should link punches correctly
Multiple Shift Punches	Employee punches across different shifts	Flag as exception and determine applicable shift
Wrong Location Punch	Employee punches at a different site/device	Flag for HR/HO TEAM verification
Unauthorized Device Punch	Punch received from device not assigned to employee/site	Reject or flag for investigation
Duplicate Punch	Same punch received multiple times	System should ignore duplicates while retaining transaction logs
Delayed Biometric Sync	Punch reaches server late due to connectivity	Process based on actual punch timestamp, not sync timestamp
Manual Attendance	Attendance needs to be entered manually	Restrict to authorized users and require reason
Attendance Correction After Lock	Correction required after attendance/payroll lock	Require higher-level approval and maintain audit trail
Absent to Present	Employee incorrectly marked absent	Regularization with reason and approval
Present to Absent	Incorrect attendance needs correction	Authorized correction only
Late to Present	Late mark needs correction due to official reason	Approval required

Exception / Regularization	Scenario	System Treatment
Present to Leave	Attendance should be replaced with approved leave	Process only after leave approval
Leave to Present	Employee actually worked on approved leave	Leave cancellation/reversal + attendance processing
Comp-Off	Employee works on weekly off/holiday and is eligible for compensatory leave	Generate/request comp-off according to policy
Emergency / Special Duty	Employee works under exceptional circumstances	Special attendance code with approval
Medical / Emergency Absence	Absence requires special treatment	Allow authorized regularization based on policy/documentation
System Error	Attendance calculation is incorrect due to system/integration issue	Allow HR correction with system-error reason
Integration Failure	Biometric data was not received	Generate exception; do not automatically assume absence
Employee Transfer	Employee transferred between locations/company	Attendance should follow effective transfer date
Employee Status Change	Probation → Confirmed, Active → Notice, etc.	Attendance/leave eligibility should change based on effective date

Payroll Generation

Title	Key Points	Description
Payroll Configuration	**Payroll Master**	1. Payroll should be configurable **Company-wise**. 2. Payroll frequency should be configurable, normally **Monthly**. 3. Payroll period should have **Start Date and End Date**. 4. Payroll processing date and salary payment date should be configurable. 5. Separate payroll processing should be supported for different companies, employee categories or locations, if required. 6. Payroll status should be **Draft → Processed → Approved → Finalized → Paid**.

Title	Key Points	Description
Employee Eligibility	**Payroll Employee Selection**	1. Only employees with **Active/eligible payroll status** should be included. 2. Employee must have a valid Employee ID and Company mapping. 3. Employee joining date should determine payroll eligibility. 4. Employee confirmation/probation status should be considered where applicable. 5. Resigned/terminated employees should be processed based on their **Last Working Date** and applicable Full & Final rules. 6. Contractor employees should be handled separately if they follow a different payroll process.
Salary Structure	**Earnings Configuration**	1. Salary structure should be maintained employee-wise. 2. Components may include **Basic, HRA, Conveyance, Special Allowance, Other Allowances, Bonus, Incentives, etc.** 3. Each component should have a calculation method such as **Fixed Amount / Percentage / Formula**. 4. Salary structure should have an **Effective From Date**. 5. Salary revisions should not overwrite historical salary structures.
Attendance Input	**Working Days**	1. Payroll should receive attendance information from the Attendance module. 2. Calculate **Total Calendar Days, Working Days, Present Days, Absent Days, Paid Days and Unpaid Days**.3. Attendance should consider assigned shift, working hours, weekly offs, holidays and site shutdowns. 4. Approved attendance regularizations should be included. 5. Pending attendance exceptions should be identified before payroll finalization.
Leave Input	**Leave Impact**	1. Approved leave should be considered during payroll processing. 2. Paid and unpaid leave should be differentiated. 3. Leave without pay (**LWP/LOP**) should reduce payable salary where applicable.

Title	Key Points	Description
		4. Leave balance should be updated based on approved leave. 5. Leave during probation/notice period should follow configured policy. 6. Leave encashment should be processed where applicable.
Loss of Pay	**LOP / Unpaid Days**	1. Calculate LOP based on applicable unpaid absence/leave rules. 2. LOP calculation method should be configurable, e.g. **Monthly Salary ÷ Payable Days** or company-specific formula. 3. Partial-day LOP should be supported where applicable. 4. LOP should be clearly shown in the salary calculation. 5. Any LOP adjustment should require authorization.
Overtime	**OT Calculation**	1. OT should be calculated based on the employee's assigned shift and OT policy. 2. OT eligibility should be controlled by **Shift + Employee Category + Employee Type + Company**. 3. Approved OT should be included in payroll. 4. OT rates/formulas should be configurable. 5. Minimum OT duration, rounding and maximum limits should be configurable. 6. OT worked on **weekly off / holiday / shutdown** should follow separate rules where applicable.
Target OT	**Target OT**	1. The system should provide an option to configure **Target OT** for an employee. 2. If an employee has been assigned **Target OT**, the OT amount should be calculated based on the **allocated Target OT amount**. 3. The Target OT amount should be configurable **employee-wise** and/or based on applicable Company, Category, Role or Grade. 4. The system should capture **Target OT Amount, Effective From Date and Effective To Date**, where applicable. 5. Payroll should consider the applicable Target OT amount during salary generation. 6. Target OT should be separately identified from **Actual OT calculated based on overtime hours**. 7. The system should provide an option to select the OT calculation method: **Actual OT / Target OT / No OT**.

Title	Key Points	Description
		8. If Target OT is selected, the configured Target OT amount should be used according to the applicable payroll rule instead of the standard hourly OT calculation. 9. Any change to Target OT should maintain historical records and require appropriate authorization. 10. The Target OT amount should be included separately in the employee's payroll earnings/payslip.
Late / Early Out	**Attendance Deduction**	1. Late arrival should first consider the configured **Grace Period**. 2. Late/early-out deductions should only be applied if company policy requires them. 3. Rules should be configurable by company/category. 4. Approved regularizations should override the applicable deduction.
Employee Changes	**Mid-Month Changes**	1. Employee joining during the payroll period should be **prorated**. 2. Employee resignation/termination during the month should be prorated based on the applicable last working date. 3. Salary revision during the month should support **effective-date-based proration**. 4. Promotion/designation/grade changes affecting salary should be considered from the effective date. 5. Company/location transfer should be handled based on the applicable payroll rules.
Earnings	**Salary Calculation**	1. Calculate Basic Salary. 2. Calculate HRA. 3. Calculate allowances. 4. Calculate OT. 5. Calculate incentives/bonus, if applicable. 6. Calculate arrears, if applicable. 7. Calculate other earnings configured by HR/Payroll. 8. Total earnings should be calculated automatically.
Deductions	**Payroll Deductions**	1. PF deduction, where applicable. 2. ESIC deduction, where applicable.

Title	Key Points	Description
		3. Professional Tax, where applicable. 4. Labour Welfare Fund, where applicable. 5. TDS/income-tax deduction, where applicable. 6. Salary advance deduction. 7. Loan deduction. 8. Other approved deductions. 9. Total deductions should be calculated automatically.
Statutory Compliance	**Statutory Calculation**	1. Statutory deductions should be calculated according to the applicable employee/company rules. 2. Employee and employer contributions should be separately maintained where applicable. 3. Statutory limits and eligibility should be configurable. 4. Statutory reports should be generated from payroll data. 5. Changes in statutory configuration should maintain an effective date.
Arrears	**Previous Period Adjustment**	1. Payroll should support arrears for previous periods. 2. Arrears may arise from **salary revision, attendance correction, OT correction, leave correction, etc.** 3. Arrears should identify the applicable previous payroll period. 4. Arrears should be separately displayed in the salary statement.
Full & Final Settlement	**Employee Exit**	1. Employees leaving during the payroll period should be processed through Full & Final Settlement where applicable. 2. Calculate payable salary up to the Last Working Date. 3. Include eligible leave encashment. 4. Deduct notice-period recovery, loans, advances and other applicable deductions. 5. Include approved arrears/dues. 6. Asset recovery/clearance should be considered where applicable. 7. Final settlement should require authorized approval.

Title	Key Points	Description
Payroll Validation	**Pre-Payroll Checks**	Before generating payroll, the system should validate: 1. Missing salary structure 2. Missing bank details 3. Missing statutory details 4. Unprocessed attendance exceptions 5. Pending leave approvals 6. Missing/invalid employee mappings 7. Duplicate employees 8. Invalid shift assignment 9. Invalid OT records 10. Negative leave/payable balance where applicable
Payroll Generation	**Payroll Processing**	1. System should generate payroll based on all approved inputs. 2. Payroll should generate employee-wise salary calculations. 3. Gross Earnings, Total Deductions and Net Pay should be calculated automatically. 4. Payroll should show detailed calculation components. 5. Payroll should support **recalculation** before finalization. 6. Once finalized, payroll should be locked against unauthorized changes.
Payroll Approval	**Approval Workflow**	1. Payroll should be reviewed by Payroll/HR. 2. HO TEAM/authorized management should approve the payroll. 3. Rejected payroll should return for correction and reprocessing. 4. Approval history should be maintained.
Salary Payment	**Bank / Payment Processing**	1. Generate salary payment/bank file where applicable. 2. Payment should be based on finalized net salary. 3. Maintain payment status such as **Pending / Processed / Paid / Failed**. 4. Payment date and transaction/reference number should be maintained.

Title	Key Points	Description
Payslip	**Employee Salary Statement**	1. Generate employee-wise payslip. 2. Payslip should show **Earnings, Deductions, LOP, OT, Gross Salary, Net Salary and statutory deductions**. 3. Payslip should be downloadable/available to the employee. 4. Payslip should remain available historically for previous payroll periods.
Payroll Lock & Audit	**Control & History**	1. Finalized payroll should be locked. 2. Any post-finalization correction should require authorization. 3. System should maintain complete payroll audit history. 4. Maintain **Created By, Processed By, Approved By, Finalized By, Dates and changes**. 5. Previous payroll versions/calculations should be traceable.

Add to Payroll Generation

Title	Key Points	Description
Employee Loan	**Company Loan Facility**	1. The system should allow an employee to request a **Loan from the Company**. 2. Loan eligibility should be configurable based on Company, Employee Category, Role/Grade, tenure or other applicable criteria. 3. Loan request should include **Loan Amount, Purpose, Request Date, Tenure/Number of Installments, Interest Rate (if applicable) and Proposed Start Date**. 4. Loan request should follow an approval workflow such as **Reporting Manager → HOD → HR/Finance**, as configured. 5. Once approved, the loan should be added to the employee's outs tanding loan balance. 6. Monthly installment should be automatically deducted through Payroll. 7. The system should maintain **Principal Amount, Interest, Installment Amount, Amount Recovered and Outstanding Balance**.

Title	Key Points	Description
		8. Early/full loan repayment should be supported where applicable. 9. Loan restructuring or installment changes should require authorization. 10. Loan details and recovery history should be available for audit.
Salary Advance	**Advance Salary Facility**	1. The system should allow an employee to request a **Salary Advance**. 2. Advance eligibility and maximum amount should be configurable based on company policy. 3. Request should include **Advance Amount, Reason, Request Date and Recovery Period**. 4. Advance request should follow the configured approval workflow. 5. Approved salary advance should be paid to the employee and recorded as an **Outstanding Advance**. 6. Recovery should be made through one or multiple payroll deductions according to the approved recovery schedule. 7. The system should maintain **Advance Amount, Recovered Amount and Outstanding Balance**. 8. The system should prevent a new advance where the employee has an outstanding advance, if company policy does not permit multiple advances. 9. Any exception/override should require authorized approval. 10. Salary advance recovery should be shown separately in the payslip.
Loan / Advance Recovery	**Payroll Deduction**	1. Payroll should automatically identify the employee's approved **Loan and Salary Advance** deductions for the payroll period. 2. The system should deduct only the scheduled installment/amount approved for that period. 3. The system should prevent deductions exceeding the applicable outstanding balance. 4. If an employee joins, resigns or is terminated during the recovery period, the remaining balance should be considered in **Full & Final Settlement**, subject to company policy.

Title	Key Points	Description
		5. Any missed recovery should be carried forward according to the configured rule.6. Recovery transactions should be linked to the original loan/advance request.
Loan / Advance Approval	**Authorization & Control**	1. Loan and salary advance requests should have separate approval workflows if required. 2. Approvers should be configurable by Company/Category/Amount. 3. The system should support **Pending / Approved / Rejected / Cancelled / Partially Recovered / Fully Recovered** statuses. 4. Rejection/cancellation should require a reason. 5. Any change to an approved amount or recovery schedule should be recorded in the audit trail.
Payroll Impact	**Salary Calculation**	1. Loan installment and salary advance recovery should be shown separately from statutory deductions. 2. The payslip should clearly display the applicable deduction. 3. Loan/advance recovery should reduce **Net Pay** only after the deduction is approved and scheduled. 4. The system should provide an employee-wise outstanding balance report. 5. Payroll should maintain a complete recovery ledger.

Notifications:

Title	Key Points	Description
Leave Notifications & Routing	**Standard Routing Rule**	1. All leave-related applications and transactions should automatically be routed/notified to the employee's **Reporting Supervisor and HO Team**. 2. This should be a standard system rule applicable to all employees and leave types. 3. HO Team should have visibility of the complete leave application lifecycle.
New Leave Application	**Supervisor + HO Team**	1. Whenever an employee submits a new leave application, notification should be sent to the **Reporting Supervisor and HO Team**.

Title	Key Points	Description
		2. Application should include Employee, Leave Type, From Date, To Date, Number of Days, Reason and supporting documents, if applicable. 3. Supervisor can take the configured approval action.
Leave Approval	**Approval Notification**	1. When leave is approved by the Supervisor/authorized user, the employee and HO Team should receive the approval notification. 2. Approval details should be recorded in the leave history.
Leave Rejection	**Rejection Notification**	1. When leave is rejected, the employee and HO Team should be notified. 2. Rejection reason should be mandatory. 3. Rejection status and reason should be stored in the leave transaction history.
Leave Return for Correction	**Correction Required**	1. Supervisor/HO Team can return an application for correction where permitted. 2. Employee should receive the correction request with the reason/remarks. 3. Revised application should again be routed to the Supervisor and HO Team.
Leave Cancellation Request	**Cancellation**	1. Employee cancellation requests should be routed to the **Reporting Supervisor and HO Team**. 2. Approved cancellation should restore the applicable leave balance. 3. Cancellation action and reason should be recorded.
Approved Leave Cancellation	**Post-Approval Cancellation**	1. If an employee requests cancellation of already approved leave, the Supervisor/HO Team should be notified. 2. Authorized user approval should be required as per policy. 3. Attendance and leave balance should be recalculated after approval.

Title	Key Points	Description
Leave Modification	**Change in Leave Dates / Type**	1. Changes to submitted or approved leave should be routed to the **Supervisor and HO Team**. 2. System should show the original and revised values. 3. Modified leave should undergo the configured approval process again where required.
Leave Extension	**Extension Request**	1. Employee can request an extension of an existing leave, subject to policy. 2. Extension request should be sent to the Supervisor and HO Team. 3. Balance and eligibility should be revalidated for the extended period.
Leave Regularization	**Absence to Leave**	1. Where permitted, an employee/authorized user can request regularization of an absence as leave. 2. Request should be routed to Supervisor and HO Team. 3. System should validate leave balance, eligibility and applicable policy before submission.
Backdated Leave Application	**Previous-Date Leave**	1. If backdated leave is permitted, the application should be routed to the Supervisor and HO Team. 2. Backdated application should identify the number of days by which the request is delayed. 3. Additional approval may be required based on configured rules.
Leave During Probation	**Probation Exception**	1. If a leave type is restricted during probation but an exception is allowed, the request should be routed to the Supervisor and HO Team. 2. Authorized approval should be mandatory for such exceptions. 3. System should maintain the exception reason and approval history.
Leave During Notice Period	**Notice Period Exception**	1. Where leave is normally blocked during notice period, an authorized exception request can be raised. 2. The request should be routed to the **Supervisor and HO Team**.

Title	Key Points	Description
		3. Only authorized **HR/HO TEAM** users should be able to approve such exceptions, as per policy. 4. Reason and approval history should be maintained.
Leave Balance Adjustment	**Manual Credit / Debit**	1. Authorized HR/HO Team users can request or perform leave balance adjustments. 2. Adjustment details should include Employee, Leave Type, Previous Balance, Adjustment Days, New Balance and Reason. 3. Adjustment should be recorded as a separate ledger transaction.
Leave Credit	**Monthly Leave Allocation**	1. Monthly leave credit should be automatically processed according to the configured policy. 2. HO Team should have visibility of the monthly credit process and exceptions. 3. Any failed or skipped credit should be reported for HR/HO Team action.
Leave Carry Forward	**Year-End Processing**	1. Where **Carry Forward = Applicable**, the system should process eligible unused balance at year-end. 2. HO Team should receive the processing status/exceptions. 3. Where Carry Forward is Not Applicable, unused balance should expire according to policy. 4. Carry-forward transactions should be recorded in the leave ledger.
Leave Encashment	**Conditional Application**	1. Where **Leave Encashment = Applicable**, an employee/authorized user can initiate an encashment request according to policy. 2. Request should be routed to the appropriate **Supervisor and HO Team**. 3. Approved encashment should be sent to Payroll for processing. 4. If Leave Encashment is Not Applicable, the system should not allow the request.

Title	Key Points	Description
Comp-Off Application	**Conditional**	1. Where Comp-Off is applicable, an employee can apply using eligible Comp-Off balance. 2. Application should be routed to the Supervisor and HO Team. 3. System should validate available Comp-Off balance and expiry date.
Comp-Off Credit	**Holiday / Weekly-Off Working**	1. When an employee works on an eligible Holiday/Weekly Off, Comp-Off credit should be generated according to policy. 2. HO Team should have visibility of generated Comp-Off transactions. 3. Credit should be linked to the original attendance/working transaction.
Comp-Off Cancellation / Adjustment	**Authorized Correction**	1. Cancellation or adjustment of Comp-Off should be routed to Supervisor and HO Team. 2. Reason should be mandatory. 3. Original transaction should remain available for audit.
Leave Document Submission	**Supporting Documents**	1. Where documents are mandatory, employee should be able to upload supporting documents with the leave application. 2. Supervisor and HO Team should be able to view the submitted documents based on access rights. 3. Missing mandatory documents should prevent submission.
Leave Document Resubmission	**Correction / Rejection**	1. If supporting documents are rejected or insufficient, employee should be notified to resubmit. 2. Resubmission should again be visible to Supervisor and HO Team. 3. Document history should be maintained.
Leave Overlap / Conflict	**Validation Notification**	1. System should identify overlapping leave applications. 2. Employee should be prevented from submitting duplicate/overlapping requests where policy does not allow them.

Title	Key Points	Description
		3. HO Team should be able to view the validation exception where required.
Leave Balance Shortage	**Insufficient Balance**	1. If requested leave exceeds available balance, the system should display the shortage. 2. Application should be blocked unless negative balance/exception is permitted by policy. 3. Any authorized exception should be routed to the Supervisor and HO Team.
Leave Approval Reminder	**Pending Approval**	1. System should send reminders to the Reporting Supervisor for pending leave applications. 2. HO Team should receive visibility of pending applications. 3. Escalation should occur when the configured approval timeline is exceeded.
Leave Status Change	**Status Notification**	1. Any status change such as **Submitted, Approved, Rejected, Returned, Cancelled or Regularized** should be recorded. 2. Relevant users should receive notifications based on the action. 3. HO Team should have visibility of the complete status history.
Leave Withdrawal	**Employee Withdrawal**	1. Where permitted, an employee can withdraw a pending leave application before approval. 2. Withdrawal should be notified to the Supervisor and HO Team. 3. Withdrawn applications should not affect the leave balance.
Leave Post-Payroll Correction	**Payroll Impact**	1. Any leave correction after payroll processing should be routed to the authorized **HO Team/HR** for review. 2. Payroll impact should be identified automatically. 3. Recalculation/adjustment should require authorized approval and maintain audit history.

Title	Key Points	Description
Leave Period Lock	**Locked Period**	1. Leave applications or modifications for a locked period should be restricted. 2. Any exception should require authorized HO Team/HR approval. 3. System should record the reason, approver and date/time.
Leave Notification History	**Complete Communication Audit**	1. System should maintain notification history for all leave-related applications. 2. History should include **Employee, Application ID, Notification Type, Recipient, Date/Time, Delivery Status and Action**. 3. HO Team should be able to view the complete communication history.
Standard Recipient Rule	**Reporting Supervisor + HO Team**	1. **All leave-related applications should be visible to both the Reporting Supervisor and HO Team.** 2. The Reporting Supervisor is the primary operational reviewer/approver where configured. 3. HO Team should maintain overall visibility, monitoring and exception control. 4. No leave application should become invisible to HO Team due to employee, location, department or leave type.

Notifications & Reminder Settings – Leave, Attendance, Payslip & Exit

Title	Key Points	Description
Notification & Reminder Configuration	**Central Settings**	1. The system should provide a centralized **Notification & Reminder Settings** screen. 2. Notifications should be configurable for **Leave, Attendance, Payslip and Employee Exit** processes. 3. Each notification/reminder should have **Active / Inactive** status. 4. Notification rules should be configurable by **Company** where required. 5. System-generated notifications should maintain complete delivery and action history.

Title	Key Points	Description
Notification Recipient Configuration	**Employee / Supervisor / HO Team / HR**	1. Recipients should be configurable according to transaction type. 2. For all employee leave and attendance-related applications, the standard recipients should include **Reporting Supervisor and HO Team**. 3. Employee should receive notifications for actions taken on their applications. 4. HR/HO Team should receive applicable exception and escalation notifications.
Notification Channel	**System / Email / Mobile**	1. Notification channels should be configurable as **In-System Notification, Email and Mobile/Push Notification**, where available. 2. One or multiple channels may be enabled for each notification type. 3. Critical notifications can be configured as mandatory system notifications.
Reminder Frequency	**Configurable Reminder**	1. Reminder frequency should be configurable by transaction/event. 2. Examples include reminder after configured hours/days and repeat reminder until action is completed. 3. Reminder should automatically stop once the required action is completed.
Escalation Rule	**Pending Action Escalation**	1. If an application/action remains pending beyond the configured period, it should be escalated. 2. Escalation recipient should be configurable. 3. Escalation history should be maintained.
Leave Application Notification	**Supervisor + HO Team**	1. Every new leave application should automatically notify the **Reporting Supervisor and HO Team**. 2. Notification should contain Employee, Leave Type, From/To Date, Number of Days and Reason. 3. Applicable supporting documents should be accessible according to user permissions.
Leave Approval / Rejection	**Status Notification**	1. Employee and HO Team should be notified when leave is **Approved / Rejected / Returned for Correction**. 2. Rejection/return reason should be included. 3. Complete action history should be maintained.

Title	Key Points	Description
Leave Modification / Cancellation	**Change Notification**	1. Leave modification, extension, withdrawal and cancellation requests should notify **Supervisor and HO Team**. 2. Employee should receive notification after action is taken. 3. Original and revised application details should remain available.
Leave Approval Reminder	**Pending Supervisor Action**	1. System should remind the Reporting Supervisor about pending leave applications after the configured period. 2. HO Team should have visibility of pending applications. 3. Pending applications can be escalated after the configured timeline.
Leave Balance Notification	**Balance Information**	1. Employee can be notified about leave credit and applicable balance changes. 2. Monthly leave credit notification can be enabled/disabled. 3. Manual balance adjustment should generate a notification to the employee where configured.
Leave Policy Restriction Notification	**Probation / Notice / Balance**	1. System should provide appropriate notification/message when leave is blocked due to **Probation, Notice Period, Insufficient Balance, Locked Period or other policy restriction**. 2. Where an exception request is permitted, it should be routed to Supervisor and HO Team.
Attendance Regularization Application	**Supervisor + HO Team**	1. All Attendance Regularization requests should automatically notify the **Reporting Supervisor and HO Team**. 2. Notification should identify Attendance Date, Shift, Existing Punch/Status, Requested Correction and Reason. 3. Supporting documents should be included where applicable.
Attendance Regularization Status	**Approval / Rejection**	1. Employee and HO Team should be notified when an attendance regularization request is **Approved / Rejected / Returned for Correction**. 2. Final attendance status should be displayed in the notification.

Title	Key Points	Description
Missing Punch Notification	**IN / OUT Punch Missing**	1. System should identify missing IN/OUT punches after attendance processing. 2. Employee should receive a notification to regularize the missing punch. 3. Supervisor and HO Team should have visibility of unresolved missing-punch cases. 4. Reminder should continue according to configuration until resolved or the regularization period expires.
Late Arrival Notification	**Late Mark**	1. System should notify the employee when attendance is marked Late according to Shift/Grace Period rules. 2. Supervisor/HO Team should have visibility where required. 3. Repeated late arrivals can trigger a configurable escalation.
Early-Out Notification	**Early Departure**	1. Employee should be notified when Early-Out is detected. 2. Employee can submit regularization where permitted. 3. Pending regularization should be visible to Supervisor and HO Team.
Absent Notification	**Attendance Exception**	1. If an employee is marked Absent after attendance processing, the system should notify the employee. 2. Employee should be able to apply for Leave/Regularization where permitted. 3. Supervisor and HO Team should have visibility of unresolved absences.
Attendance Exception Reminder	**Pending Regularization**	1. System should remind employees about unresolved **Missing Punch, Absent, Late, Early-Out or other attendance exceptions**. 2. Reminder frequency should be configurable. 3. Supervisor and HO Team should receive escalation before the regularization cut-off date.
Attendance Cut-Off Reminder	**Regularization Deadline**	1. Employees should be reminded before the attendance regularization cut-off. 2. Supervisor should be reminded about pending approvals before attendance lock. 3. HO Team should receive a summary of unresolved cases before payroll processing.

Title	Key Points	Description
Holiday / Weekly-Off Working Notification	**Exceptional Working**	1. Applicable Holiday/Weekly-Off working should be identified. 2. Supervisor and HO Team should be notified where approval/verification is required. 3. Applicable OT/Comp-Off workflow should follow configured rules.
Site Shutdown Notification	**Shutdown Intimation**	1. Shutdown Intimation raised by Manager/Supervisor should notify the applicable **HOD/HO Team**. 2. Approval, rejection, modification, cancellation or extension should generate notifications to concerned users. 3. Pending shutdown approval reminders should be configurable.
Attendance Lock Reminder	**Payroll Readiness**	1. HO Team/authorized users should receive a reminder before attendance is finalized/locked. 2. Reminder should identify unresolved attendance and leave exceptions. 3. Final attendance lock should trigger a completion notification.
Payslip Generated Notification	**Employee Notification**	1. Once payroll is finalized and the payslip is generated, the employee should receive a notification. 2. Notification should mention applicable **Payroll Month/Period**. 3. Employee should be able to access the payslip according to system permissions.
Payslip Published Notification	**Payslip Available**	1. Notification should be generated only when the payslip is officially **Published/Released** to the employee. 2. Draft payroll/payslips should not generate employee notifications. 3. Published date/time should be recorded.
Revised Payslip Notification	**Payroll Correction**	1. If a finalized payslip is revised through an authorized payroll correction, the employee should be notified. 2. Notification should clearly identify that a **Revised Payslip** is available. 3. Previous payslip versions should remain available according to policy/audit requirements.
Payroll Exception Reminder	**Pending Payroll Inputs**	1. HO Team/Payroll users should receive reminders for unresolved payroll-impacting items such as attendance exceptions, LOP, OT, leave, loan/advance deductions or

Title	Key Points	Description
		other pending inputs. 2. Reminder should be generated before payroll finalization.
Resignation Submission Notification	**Exit Initiation**	1. When an employee submits resignation, notification should be sent to **Reporting Supervisor and HO Team/HR**. 2. Notification should contain Resignation Date, proposed Last Working Date and Reason, where applicable. 3. Exit workflow should start according to company policy.
Resignation Approval / Action	**Exit Status**	1. Employee and concerned users should be notified when resignation is **Accepted / Rejected / Returned for Correction**. 2. Approved Last Working Date should be communicated to the employee. 3. Action history should be maintained.
Notice Period Reminder	**Notice Period Tracking**	1. System should provide reminders for employees serving notice period. 2. Reminder can be generated before the **Last Working Date** based on configurable days. 3. HO Team/HR and Supervisor should receive applicable exit reminders.
Exit Clearance Reminder	**Department / Asset Clearance**	1. System should notify concerned users when employee exit clearance is initiated. 2. Pending clearance reminders should be generated for applicable departments/users. 3. Clearance may include **Assets, Loan/Advance, Attendance, Leave, Payroll and other company obligations**.
Asset Return Reminder	**Pending Company Assets**	1. Employee and responsible users should be reminded about pending company asset returns before Last Working Date. 2. Reminder should identify pending allocated assets. 3. Non-return/loss/damage should follow the configured Asset Fine workflow.
Loan / Salary Advance Reminder	**Outstanding Recovery**	1. HO Team/Payroll should be notified about outstanding **Employee Loan / Salary Advance** during exit processing.

Title	Key Points	Description
		2. Outstanding balance should be considered in Full & Final Settlement according to approved rules.
Full & Final Settlement Reminder	**F&F Pending**	1. After Last Working Date, the system should track pending Full & Final Settlement. 2. HO Team/Payroll users should receive reminders until the F&F process reaches the configured completion status. 3. Pending dependencies should be visible.
Exit Completion Notification	**Employee Exit Closed**	1. Once all required exit activities are completed, concerned users should receive an Exit Completion notification. 2. Final status and completion date should be recorded. 3. Employee status should be updated according to the approved exit process.
Employee Last Working Day Reminder	**LWD Alert**	1. Supervisor, HO Team/HR and other configured users should receive a reminder before the employee's Last Working Date. 2. Reminder period should be configurable, e.g. configured number of days before LWD. 3. Reminder should highlight pending clearance/action items.
Daily Pending Reminder	**Pending Applications**	1. System should support a consolidated reminder for pending **Leave, Attendance and Exit-related applications**. 2. Reminder should be sent to the responsible Supervisor/HO Team according to pending actions. 3. Completed transactions should automatically be removed from subsequent pending reminders.
HO Team Exception Dashboard Notification	**Consolidated Exceptions**	1. HO Team should have visibility of unresolved **Leave, Attendance, Payroll and Exit** exceptions. 2. System can provide configurable daily/periodic notification summaries. 3. Summary should identify pending count, ageing and responsible user/action.
Notification Template	**Configurable Message Content**	1. Notification templates should be maintained by transaction/event type. 2. Templates may use dynamic fields such as **Employee Name, Employee ID, Application ID, Date, Leave Type, Attendance Date, Payroll Month and Last Working**

Title	Key Points	Description
		Date. 3. Only authorized users should be able to modify notification templates.
Notification History	**Delivery Audit Trail**	1. Every notification/reminder should be logged. 2. Log should contain **Notification Type, Employee/Application Reference, Recipient, Channel, Sent Date/Time, Delivery Status and Reminder/Escalation Level**. 3. Authorized users should be able to search notification history.
Reminder Stop Rule	**Stop After Completion**	1. Reminder should automatically stop once the required action is completed. 2. Cancelled/rejected/closed transactions should not continue generating pending-action reminders. 3. Reopened transactions can restart the applicable reminder workflow.
Notification Failure	**Failed Delivery Handling**	1. Failed notification delivery should be recorded. 2. System should support retry according to configured rules where technically applicable. 3. Notification delivery failure should **not change the underlying Leave, Attendance, Payroll or Exit transaction status**.
Audit & History	**Configuration History**	1. Changes to notification/reminder configuration should maintain audit history. 2. System should record **Old Value, New Value, Changed By and Changed Date/Time**. 3. Historical transaction notifications should remain available even if the notification rule is later changed.

Notification Template Creation – Settings

Title	Key Points	Description
Notification Template Configuration	**Centralized Template Master**	1. The system should provide a dedicated **Notification Template Master** for creating and managing notification templates. 2. Templates should be configurable for **Leave, Attendance, Payslip, Payroll and Employee Exit** related events. 3. Each template should have **Active/Inactive** status.

Title	Key Points	Description
		4. Only Active templates should be used for system-generated notifications. 5. Template changes should maintain version and audit history.
Template Code	**Unique Template Identification**	1. Each notification template should have a unique **Template Code**. 2. Template Code should be system-generated or entered by an authorized user. 3. Duplicate Template Codes should not be allowed.
Template Name	**Template Description**	1. HR/Admin should provide a meaningful Template Name. 2. Example: **Leave Application Submitted**, **Missing Punch Reminder**, **Payslip Published**, **Resignation Submitted**.
Module	**Leave / Attendance / Payroll / Payslip / Exit**	1. Template should be mapped to a specific system module. 2. Available modules should include **Leave, Attendance, Payroll, Payslip and Employee Exit**. 3. Module selection should determine the available event and placeholders.
Notification Event	**Trigger Event**	1. Select the event that triggers the notification. 2. Examples: Leave Submitted, Leave Approved, Leave Rejected, Missing Punch, Attendance Regularization, Payslip Published, Resignation Submitted, Exit Clearance Pending, etc. 3. One template should be associated with a specific notification event.
Notification Type	**Notification / Reminder / Escalation**	1. Define whether the template is for a **Notification, Reminder or Escalation**. 2. Reminder templates can be linked to configured reminder schedules. 3. Escalation templates can be used when an action remains pending beyond the defined period.
Recipient Type	**Employee / Supervisor / HO Team / HR**	1. Configure the intended recipient(s). 2. Standard Leave and Attendance application notifications should support **Reporting Supervisor + HO Team**. 3. Employee should receive relevant status/action

Title	Key Points	Description
		notifications. 4. Additional recipients can be configured where required.
Notification Channel	**System / Email / WhatsApp/ SMS**	1. Template should support applicable notification channels such as **In-System Notification, Email and WhatsApp, SMS** where available. 2. Different templates/channels can be configured for the same event if required.
Subject	**Dynamic Subject**	1. Email/notification Subject should be configurable. 2. Subject should support placeholders. 3. Example: **Leave Application – {{EmployeeName}} – {{LeaveFromDate}} to {{LeaveToDate}}**.
Message Body	**Dynamic Content**	1. Template body should support rich/plain text as applicable. 2. Users should be able to enter standard message content. 3. Dynamic placeholders should be inserted into the message using the **Insert Placeholder** option. 4. System should replace placeholders with actual transaction data when the notification is generated.
Insert Placeholder	**Dynamic Fields**	1. Screen should provide an **Insert Placeholder** button/dropdown. 2. Available placeholders should be filtered according to the selected Module and Event. 3. User should not need to manually type placeholder names. 4. Selecting a placeholder should insert it at the current cursor position.
Placeholder Validation	**Invalid Placeholder Prevention**	1. System should validate all placeholders before saving the template. 2. Invalid or unsupported placeholders should not be allowed. 3. System should display an appropriate validation message if a placeholder is incorrect or unavailable for the selected event.
Missing Placeholder Value	**Blank / Default Handling**	1. System should define how a placeholder is handled when the underlying value is unavailable. 2. Depending on the field, the system may display blank, a configured default value or suppress the related content.

Title	Key Points	Description
		3. Notification generation should not fail because of a non-critical missing value.
Template Preview	**Preview with Sample Data**	1. User should be able to preview the notification before saving. 2. Preview should replace placeholders with sample values. 3. Preview should be available for each configured channel where applicable.
Send Test Notification	**Test Delivery**	1. Authorized users should be able to send a test notification before activating the template. 2. Test notification should use sample/test data and should not create an actual Leave/Attendance/Payroll transaction.
Template Status	**Draft / Active / Inactive**	1. Template should support **Draft, Active and Inactive** statuses. 2. Draft templates should not be used for live notifications. 3. Only one active template should normally be used for the same Company + Module + Event + Notification Type + Channel unless multiple versions are explicitly supported.
Company Applicability	**Company-Wise Template**	1. Templates can be configured for a specific Company. 2. Different companies may use different notification wording. 3. A common/global template may be supported where no company-specific template exists.
Reminder Schedule	**Event-Based Reminder**	1. For Reminder templates, configure when the reminder should be generated. 2. Example: **24 hours after submission**, **1 day before attendance cut-off**, or **3 days before LWD**. 3. Reminder should stop automatically when the pending action is completed.
Escalation Schedule	**Escalation Timing**	1. Configure the time after which a pending transaction should be escalated. 2. Escalation can be directed to HO Team/HR or another authorized user. 3. Escalation level should be recorded in notification history.

Title	Key Points	Description
Attachment	**Document / Payslip Attachment**	1. Where applicable, templates should support system-generated attachments. 2. Payslip notification may include a payslip attachment or secure payslip link according to security policy. 3. Sensitive documents should be accessible only to authorized recipients.
Action Link / Button	**Direct Action**	1. Notification may contain an action link/button such as **View Leave, Approve, Reject, Regularize Attendance, View Payslip or Complete Exit Clearance**. 2. Action availability should depend on recipient permissions and transaction status. 3. Links should open the appropriate system screen after authentication.
Template Version	**Version Control**	1. Every modification to an Active template should create a new version. 2. Previous versions should remain available for audit/reference. 3. Historical notifications should remain linked to the template version used when they were generated.
Audit Trail	**Template Change History**	1. System should record **Created By, Created Date/Time, Modified By, Modified Date/Time, Activated By and Activation Date/Time**. 2. Changes to Subject, Body, Placeholders, Recipients and Trigger should be recorded.

Standard Placeholder Library

Module	Placeholder	Description / Example
Employee	{{EmployeeName}}	Employee full name
Employee	{{EmployeeID}}	Employee Unique ID
Employee	{{CompanyName}}	Employee's company
Employee	{{DepartmentName}}	Employee department
Employee	{{Designation}}	Employee designation
Employee	{{LocationName}}	Employee location/site
Employee	{{SupervisorName}}	Reporting Supervisor name

Module	Placeholder	Description / Example
Leave	{{LeaveApplicationNo}}	Leave application reference number
Leave	{{LeaveType}}	CL / SL / PL etc.
Leave	{{LeaveFromDate}}	Leave start date
Leave	{{LeaveToDate}}	Leave end date
Leave	{{LeaveDays}}	Total leave days
Leave	{{LeaveReason}}	Employee's leave reason
Leave	{{LeaveStatus}}	Submitted / Approved / Rejected / Returned / Cancelled
Leave	{{LeaveBalance}}	Current available balance
Leave	{{ApprovalBy}}	Person who approved/rejected
Leave	{{ApprovalDate}}	Approval/action date
Leave	{{RejectionReason}}	Rejection reason
Attendance	{{AttendanceDate}}	Attendance date
Attendance	{{ShiftName}}	Assigned shift
Attendance	{{ShiftStartTime}}	Shift start time
Attendance	{{ShiftEndTime}}	Shift end time
Attendance	{{PunchInTime}}	Actual IN punch
Attendance	{{PunchOutTime}}	Actual OUT punch
Attendance	{{WorkingHours}}	Calculated working hours
Attendance	{{AttendanceStatus}}	Present / Absent / Late / Holiday etc.
Attendance	{{RegularizationNo}}	Regularization reference
Attendance	{{ExceptionType}}	Missing Punch / Late / Early-Out etc.
Attendance	{{ExceptionReason}}	Exception/regularization reason
Payroll	{{PayrollMonth}}	Payroll processing month
Payroll	{{GrossSalary}}	Gross salary
Payroll	{{TotalDeduction}}	Total deductions

Module	Placeholder	Description / Example
Payroll	{{NetSalary}}	Net salary
Payroll	{{LOPDays}}	LOP days
Payroll	{{OTAmount}}	OT amount
Payroll	{{LoanDeduction}}	Loan recovery amount
Payroll	{{SalaryAdvanceDeduction}}	Salary advance recovery
Payslip	{{PayslipMonth}}	Payslip month
Payslip	{{PayslipDate}}	Payslip generated/published date
Payslip	{{PayslipLink}}	Secure link to payslip
Exit	{{ResignationDate}}	Resignation date
Exit	{{NoticePeriod}}	Applicable notice period
Exit	{{LastWorkingDate}}	Expected/approved LWD
Exit	{{ExitStatus}}	Current exit status
Exit	{{ClearanceStatus}}	Exit clearance status
Exit	{{PendingAssetCount}}	Number of pending assets
Exit	{{OutstandingLoan}}	Outstanding employee loan
Exit	{{OutstandingAdvance}}	Outstanding salary advance
System	{{CurrentDate}}	Current system date
System	{{CurrentDateTime}}	Current system date/time
System	{{ApplicationNo}}	Relevant application/reference number
System	{{ActionBy}}	User who performed the action
System	{{ActionDate}}	Date of action
System	{{ActionRemarks}}	Action remarks

Letter & Form Print Configuration – Settings

Title	Key Points	Description
Letter & Form Configuration	**Centralized Letter/Form Master**	1. The system should provide a dedicated **Letter & Form Configuration** screen for creating and managing HR letters, forms and printable documents. 2. Documents should be configurable for **Employee, Leave, Attendance, Payroll and Exit** related processes. 3. Each Letter/Form should have **Active / Inactive** status. 4. Only Active templates should be available for printing/generation.
Letter / Form Master	**Document Template**	1. HR/Admin should be able to create and manage different types of letters and forms. 2. Each document should have a unique **Document Code and Document Name**. 3. Templates should support configurable content, formatting and placeholders. 4. Previous versions should be retained for audit/history.
Document Type	**Letter / Form / Certificate / Statement**	1. Configure the document type, such as **Appointment Letter, Confirmation Letter, Promotion Letter, Transfer Letter, Salary Certificate, Experience Letter, Relieving Letter, Leave Letter, Attendance Statement, Payslip and Exit Documents**. 2. Available document types should be configurable according to organizational requirements.
Document Category	**HR / Leave / Attendance / Payroll / Exit**	1. Documents should be categorized by module. 2. Category should determine available employee information and placeholders. 3. Users should be able to filter documents by category.
Company Applicability	**Company-Wise Template**	1. Letter/Form templates can be configured separately for each Company. 2. Different companies may use different letterheads, wording and formats. 3. A common template may be used where a company-specific template is not configured.
Location Applicability	**Location/Site-Wise**	1. Where required, documents can be configured based on Location/Site. 2. Company-wide templates should be available for all locations where no location-specific template exists.
Letterhead Configuration	**Company Letterhead**	1. Company-specific letterhead should be configurable. 2. Letterhead may include Company Name, Logo, Address,

Title	Key Points	Description
		Contact Details and other authorized information. 3. Header and footer should be configurable.
Document Header / Footer	**Standard Formatting**	1. Configure header and footer for printable documents. 2. Footer may include Company Address, Contact Details, Page Number, Confidentiality Statement or other standard information. 3. Header/footer should support placeholders where required.
Document Content	**Dynamic Document Body**	1. HR/Admin should be able to create document content using a document editor. 2. Content should support standard formatting such as headings, paragraphs, tables, alignment and page breaks. 3. Dynamic employee/system information should be inserted using placeholders.
Placeholder / Merge Fields	**Dynamic Employee Data**	1. Document templates should support placeholders similar to Notification Templates. 2. User should be able to select placeholders from an **Insert Placeholder** panel. 3. Placeholder list should be filtered according to document type/module. 4. System should replace placeholders with actual employee/document data during generation.
Employee Placeholders	**Employee Information**	Examples: {{EmployeeName}}, {{EmployeeID}}, {{CompanyName}}, {{DepartmentName}}, {{Designation}}, {{LocationName}}, {{DateOfJoining}}, {{SupervisorName}}.
Employment Placeholders	**Employment Details**	Examples: {{EmployeeType}}, {{EmploymentStatus}}, {{ConfirmationDate}}, {{ProbationEndDate}}, {{Role}}, {{Grade}}, {{JoiningDate}}.
Salary Placeholders	**Salary Information**	Examples: {{BasicSalary}}, {{GrossSalary}}, {{CTC}}, {{SalaryEffectiveDate}}, {{NetSalary}}, subject to user permission and document type.
Leave Placeholders	**Leave Information**	Examples: {{LeaveType}}, {{LeaveFromDate}}, {{LeaveToDate}}, {{LeaveDays}}, {{LeaveStatus}}, {{LeaveBalance}}, {{LeaveApplicationNo}}.
Attendance Placeholders	**Attendance Information**	Examples: {{AttendanceDate}}, {{ShiftName}}, {{PunchInTime}}, {{PunchOutTime}}, {{WorkingHours}}, {{AttendanceStatus}}.

Title	Key Points	Description
Exit Placeholders	**Exit Information**	Examples: {{ResignationDate}}, {{NoticePeriod}}, {{LastWorkingDate}}, {{ExitStatus}}, {{ClearanceStatus}}, {{RelievingDate}}.
Payroll / Payslip Placeholders	**Payroll Information**	Examples: {{PayrollMonth}}, {{GrossSalary}}, {{TotalDeduction}}, {{NetSalary}}, {{LOPDays}}, {{OTAmount}}, {{PayslipDate}}.
System Placeholders	**System Information**	Examples: {{CurrentDate}}, {{CurrentDateTime}}, {{DocumentNo}}, {{GeneratedBy}}, {{GeneratedDate}}.
Placeholder Validation	**Invalid Field Prevention**	1. System should validate all placeholders before saving the template. 2. Unsupported placeholders should not be allowed. 3. Missing non-critical data should be handled according to configured rules.
Document Numbering	**Automatic Document Number**	1. System should automatically generate a unique document/reference number where required. 2. Numbering can be configured by Company and Document Type. 3. Generated document numbers should not be reused.
Document Date	**Automatic / Manual Date**	1. Document Date can be system-generated or manually selected based on the document type. 2. Generated Date should be available as a placeholder.
Print Option	**Generate / Print Document**	1. Authorized users should be able to generate and print letters/forms from the relevant employee or transaction screen. 2. System should generate the document using the applicable active template. 3. Print should reflect the employee's data as of the applicable effective date.
PDF Generation	**Printable PDF**	1. System should provide an option to generate the document in PDF format. 2. PDF should preserve configured letterhead, formatting, tables, signatures and page layout. 3. Generated PDF should be stored against the employee/document transaction where required.
Print Preview	**Preview Before Print**	1. User should be able to preview the completed document before printing. 2. Preview should display actual employee information in place of placeholders.

Title	Key Points	Description
		3. User should be able to verify the document before generation/printing.
Bulk Print	**Multiple Employee Documents**	1. Authorized HR users should be able to generate/print the same document for multiple employees. 2. Employee selection should support filters such as Company, Department, Location, Designation and Employee Status. 3. System should generate individual documents for each selected employee.
Re-Print	**Historical Document**	1. Previously generated documents should be available for re-print/download based on permissions. 2. Re-print should use the **original generated version**, where historical accuracy is required. 3. System should maintain re-print history.
Document Version	**Template Version Control**	1. Changes to an active template should create a new version. 2. Previously generated documents should remain associated with the template version used at generation time. 3. Historical versions should not be overwritten.
Digital Signature	**Authorized Signatory**	1. Documents may support an authorized signatory where required. 2. Configure Signatory Name, Designation and Signature. 3. Signature should be inserted dynamically or through an approved signature image/e-signature mechanism. 4. Access to signature configuration should be restricted.
Signature Placeholder	**Dynamic Signatory**	1. Support placeholders such as {{AuthorizedSignatoryName}} and {{AuthorizedSignatoryDesignation}}. 2. Applicable signatory should be determined based on Company/Document Type where configured.
Document Approval	**Approval Before Printing**	1. Documents requiring authorization should support **Draft → Submitted → Approved → Generated/Printed** workflow. 2. Unauthorized users should not be able to issue approved documents. 3. Approval history should be maintained.
Document Cancellation	**Void / Cancel Document**	1. Authorized users should be able to cancel an issued document. 2. Cancellation reason should be mandatory. 3. Cancelled documents should remain in history and should not be deleted.

Title	Key Points	Description
Document Access Control	**Role-Based Security**	1. Access to generate, view, print, re-print and cancel documents should be controlled by user role/permission. 2. Sensitive documents such as Salary Certificates and Payslips should have restricted access.
Document Repository	**Employee Document History**	1. Generated letters/forms should be stored against the employee record where required. 2. HR should be able to view historical documents based on permissions. 3. Document metadata should include Document Type, Document Number, Version, Generated Date and Generated By.
Print History	**Audit Trail**	1. System should record every generation, print, re-print and cancellation action. 2. History should include **Employee, Document Type, Document Number, User, Date/Time and Action**. 3. Print history should be available for audit.
Document Template Preview	**Sample Data Preview**	1. HR/Admin should be able to preview a template using sample employee data before activation. 2. Placeholders should be replaced with sample values during preview. 3. This should help verify formatting and data mapping.
Test Generation	**Test Document**	1. Authorized users should be able to generate a test document before activating the template. 2. Test generation should not create an official employee document number unless explicitly confirmed.
Page Setup	**Print Layout**	1. Configure Page Size, Orientation, Margins, Header/Footer and Page Breaks. 2. Support standard formats such as **A4** and other configured sizes where required. 3. Layout should be preserved in PDF and Print output.
Document Security	**Sensitive Information Protection**	1. Salary, bank, statutory and other sensitive employee information should only be available in documents to authorized users. 2. Generated documents should follow system access-control rules. 3. Document access and generation should be auditable.

Title	Key Points	Description
Audit & History	**Complete Document History**	1. Maintain **Created By, Created Date/Time, Modified By, Modified Date/Time, Approved By, Generated By and Printed By**. 2. Maintain template changes and document generation history. 3. Historical documents should remain traceable to the template version used.

Recommended Letter/Form Types

Module	Letter / Form
Employee	Appointment Letter, Joining Letter, Confirmation Letter, Promotion Letter, Transfer Letter
Employee	Salary Certificate, Employment Certificate, Experience Certificate
Leave	Leave Approval Letter, Leave Rejection Letter, Leave Regularization Form
Attendance	Attendance Statement, Attendance Regularization Form, Attendance Exception Report
Payroll	Payslip, Salary Statement, Salary Revision Letter
Exit	Resignation Acknowledgement, Exit Clearance Form, Relieving Letter, Full & Final Statement, Experience/Service Certificate
Asset	Asset Allocation Form, Asset Return Form, Asset Handover Form
Other HR	Employee Information Form, Declaration Form, Undertaking Form, Company-specific HR Forms

Standard Reports – Report List

1. *Employee Reports*

Report Name	Purpose	Key Filters	Standard Fields / Columns
Employee Master Report	Complete employee master information	Company, Location, Department, Category, Employee Type, Designation, Status, Joining Date	Employee ID, Employee Name, Company, Location, Department, Category, Employee Type, Designation, Reporting Supervisor, Date of Joining, Confirmation Date, Employment Status
Employee Personal Details Report	Employee personal information	Company, Location, Department, Status	Employee ID, Employee Name, DOB, Gender, Mobile, Email, Address,

Report Name	Purpose	Key Filters	Standard Fields / Columns
			Emergency Contact, Blood Group, Marital Status
Employee Employment Report	Employment and career details	Company, Department, Designation, Employee Type, Status	Employee ID, Employee Name, Company, Department, Designation, Grade, Employee Type, Joining Date, Confirmation Date, Probation End Date, Reporting Supervisor, Status
Employee Joining Report	New employee joining analysis	Company, Location, From Date, To Date, Department	Employee ID, Employee Name, Joining Date, Company, Location, Department, Designation, Employee Type, Reporting Supervisor
Employee Exit Report	Employee resignation/exit details	Company, Location, Department, Exit Status, From Date, To Date	Employee ID, Employee Name, Company, Department, Designation, Resignation Date, Notice Period, Last Working Date, Exit Status, Exit Reason
Employee Status Report	Current employee status	Company, Location, Status, Employee Type	Employee ID, Employee Name, Company, Location, Department, Designation, Employee Type, Joining Date, Status, Status Effective Date
Employee Transfer Report	Track employee transfers	Company, From Location, To Location, From Date, To Date	Employee ID, Employee Name, Previous Company, New Company, Previous Location, New Location, Previous Department, New Department, Transfer Date, Approved By
Employee Document Report	Document availability and verification	Company, Location, Document Type, Verification Status	Employee ID, Employee Name, Document Type, Document Number/Reference, Submission Date, Verification Status, Verified By, Verification Date, Expiry Date
eKYC Verification Report	Track eKYC status	Company, Location, eKYC Status, From Date, To Date	Employee ID, Employee Name, Verification Type, Verification Status, Verification Date, Failure/Exception Reason, Attempt Count, Verified By
Employee Biometric Mapping Report	Employee-device mapping	Company, Location, Device, Status	Employee ID, Employee Name, Company, Location, Device ID, Biometric ID, Mapping Date, Status, Deactivation Date

2. *Leave Reports*

Report Name	Purpose	Key Filters	Standard Fields / Columns
Leave Balance Report	Current leave balance	Company, Location, Department, Employee, Leave Type	Employee ID, Employee Name, Leave Type, Opening Balance, Monthly Credit, Leave Availed, Adjustments, Carry Forward if Applicable, Available Balance
Leave Ledger Report	Complete leave transaction history	Company, Employee, Leave Type, Date Range, Transaction Type	Transaction ID, Employee ID, Employee Name, Leave Type, Transaction Date, Transaction Type, Credit, Debit, Adjustment, Balance, Remarks, Created By
Leave Application Report	All leave applications	Company, Location, Department, Leave Type, Status, Date Range	Application No., Employee ID, Employee Name, Leave Type, From Date, To Date, Days, Reason, Application Date, Status, Supervisor, HO Team Status
Leave Approval Pending Report	Pending approvals	Company, Supervisor, HO Team, Ageing	Application No., Employee ID, Employee Name, Leave Type, From Date, To Date, Days, Submitted Date, Pending With, Pending Days, Status
Leave Rejection Report	Rejected leave analysis	Company, Location, Leave Type, Date Range	Application No., Employee ID, Employee Name, Leave Type, Dates, Days, Rejection Reason, Rejected By, Rejection Date
Leave Cancellation Report	Cancelled leave transactions	Company, Employee, Leave Type, Date Range	Application No., Employee ID, Employee Name, Leave Type, Original Dates, Days, Cancellation Date, Cancelled By, Reason
Leave Regularization Report	Leave regularization tracking	Company, Location, Status, Date Range	Regularization No., Employee ID, Employee Name, Attendance Date, Leave Type, Requested Days, Reason, Status, Approved By
Probation Leave Report	Leave taken during probation	Company, Employee, Leave Type, Date Range	Employee ID, Employee Name, Probation Start, Probation End, Leave Type, Leave Dates, Days, Approval Status, Approved By

Report Name	Purpose	Key Filters	Standard Fields / Columns
Notice Period Leave Report	Leave during notice period	Company, Department, Employee, Status	Employee ID, Employee Name, Resignation Date, Notice Period, LWD, Leave Type, Leave Dates, Days, Exception/Approval Status, Approved By
Monthly Leave Credit Report	Monthly accrual monitoring	Company, Location, Month, Leave Type	Employee ID, Employee Name, Leave Type, Eligible Month, Credit Days, Credit Date, Status, Remarks
Leave Encashment Report	Encashment tracking where applicable	Company, Location, Employee, Leave Type, Date Range	Employee ID, Employee Name, Leave Type, Eligible Days, Encashed Days, Calculation Basis, Encashment Amount, Approval Status, Payroll Month
Leave Carry Forward Report	Carry-forward tracking where applicable	Company, Leave Type, Year	Employee ID, Employee Name, Leave Type, Previous Balance, Eligible Carry Forward, Carried Forward Days, Expired Days, New Balance
Leave Policy Report	Configured policy overview	Company, Category, Employee Type, Leave Type	Company, Category, Employee Type, Role/Designation, Leave Type, Monthly Credit, Probation Rule, Confirmation Rule, Notice Rule, Carry Forward Applicable, Encashment Applicable, Status

---

3. *Attendance Reports*

Report Name	Purpose	Key Filters	Standard Fields / Columns
Daily Attendance Report	Daily employee attendance	Company, Location, Department, Date, Shift	Employee ID, Employee Name, Date, Shift, IN Time, OUT Time, Working Hours, Attendance Status, Late, Early-Out, OT
Monthly Attendance Report	Monthly attendance summary	Company, Location, Department, Month	Employee ID, Employee Name, Working Days, Present, Absent, Leave, Holiday, Weekly Off, LOP, Late Count, Early-Out Count, OT Hours
Attendance Register	Detailed attendance register	Company, Location, Department, Date Range	Employee ID, Employee Name, Date, Shift, IN, OUT, Working Hours, Status, Leave, Holiday, Weekly Off, OT

Report Name	Purpose	Key Filters	Standard Fields / Columns
Missing Punch Report	Missing IN/OUT punches	Company, Location, Date Range, Status	Employee ID, Employee Name, Date, Shift, IN Time, OUT Time, Missing Punch Type, Regularization Status, Pending With
Late Arrival Report	Late attendance analysis	Company, Location, Department, Date Range	Employee ID, Employee Name, Date, Shift Start, Actual IN, Grace Period, Late Minutes, Status, Regularization
Early-Out Report	Early departure analysis	Company, Location, Department, Date Range	Employee ID, Employee Name, Date, Shift End, Actual OUT, Early Minutes, Status, Regularization
Absent Report	Employee absence tracking	Company, Location, Department, Date Range	Employee ID, Employee Name, Date, Shift, Absence Status, Leave Applied, Leave Status, Regularization Status
Attendance Regularization Report	Track attendance corrections	Company, Location, Status, Date Range	Request No., Employee ID, Employee Name, Attendance Date, Original IN/OUT, Requested IN/OUT, Exception Type, Reason, Status, Approved By
OT Report	Overtime analysis	Company, Location, Department, Employee, Date Range	Employee ID, Employee Name, Date, Shift, OT Hours, OT Type, OT Rate, OT Amount, Approval Status, Approved By
Target OT Report	Target OT allocation and payment	Company, Employee, Department, Month	Employee ID, Employee Name, Target OT Applicable, Target OT Amount, Effective From, Effective To, Payroll Month, Paid Amount
Holiday Working Report	Employees working on holidays	Company, Location, Date Range	Employee ID, Employee Name, Holiday Name, Holiday Date, IN Time, OUT Time, Working Hours, OT, Comp-Off, Approval Status
Weekly-Off Working Report	Weekly-off attendance	Company, Location, Date Range	Employee ID, Employee Name, Date, Weekly Off, IN, OUT, Working Hours, OT, Comp-Off, Approval Status
Site Shutdown Attendance Report	Shutdown vs actual attendance	Company, Location, Shutdown Date, Status	Employee ID, Employee Name, Shutdown Date, Expected to Work, Actual Punch, Attendance Status,

Report Name	Purpose	Key Filters	Standard Fields / Columns
			Worked During Shutdown, Exception Status
Attendance Exception Report	Consolidated exceptions	Company, Location, Department, Exception Type, Status	Employee ID, Employee Name, Date, Shift, Exception Type, Original Status, Requested Correction, Reason, Status, Pending With

---

4. *Holiday Reports*

Report Name	Purpose	Key Filters	Standard Fields / Columns
Holiday List Report	Annual holiday calendar	Company, Location, Year	Holiday Code, Holiday Name, Holiday Date, Day, Category, Company, Location, Status
Company-Wise Holiday Report	Compare company calendars	Company, Year	Company, Holiday Name, Date, Category, Status
Location-Wise Holiday Report	Location-specific holidays	Company, Location, Year	Company, Location, Holiday Name, Date, Day, Category, Status
Holiday Working Report	Holiday attendance	Company, Location, Date Range	Employee ID, Employee Name, Holiday, Date, IN, OUT, Working Hours, OT, Comp-Off

---

5. *Payroll Reports*

Report Name	Purpose	Key Filters	Standard Fields / Columns
Payroll Summary Report	Monthly payroll summary	Company, Payroll Month, Department	Employee ID, Employee Name, Basic, HRA, Allowances, OT, Incentives, Bonus, Arrears, Gross, Deductions, Net Salary
Payroll Register	Detailed payroll register	Company, Location, Department, Month	Employee ID, Employee Name, Salary Components, Attendance Days, Leave, LOP, OT, Gross, Statutory Deductions, Other Deductions, Net

Report Name	Purpose	Key Filters	Standard Fields / Columns
Salary Component Report	Component-wise salary	Company, Month, Component	Employee ID, Employee Name, Basic, HRA, Allowances, OT, Bonus, Incentives, Arrears
LOP Report	Loss of Pay	Company, Department, Month	Employee ID, Employee Name, LOP Days, LOP Amount, Reason, Leave Reference
OT Payroll Report	OT payment	Company, Month	Employee ID, Employee Name, OT Hours, OT Rate, OT Amount, Target OT Amount, Total OT Payment
Statutory Deduction Report	Statutory deductions	Company, Month	Employee ID, Employee Name, PF, ESIC, PT, TDS, LWF, Employee Contribution, Employer Contribution
Loan Deduction Report	Employee loan recovery	Company, Month, Loan Status	Employee ID, Employee Name, Loan ID, Opening Outstanding, Installment, Interest, Recovered, Closing Outstanding
Salary Advance Report	Salary advance recovery	Company, Month, Status	Employee ID, Employee Name, Advance ID, Advance Amount, Recovered Amount, Outstanding Amount, Recovery Month
Payroll Adjustment Report	Manual payroll adjustments	Company, Month, Adjustment Type	Employee ID, Employee Name, Adjustment Type, Amount, Reason, Created By, Approved By
Arrears Report	Salary/attendance arrears	Company, Month	Employee ID, Employee Name, Arrear Type, Previous Amount, Revised Amount, Arrear Amount, Effective Date
Bank Payment Report	Salary payment	Company, Payroll Month, Payment Status	Employee ID, Employee Name, Bank Name, Account Reference, Net Salary, Payment Status, Payment Date
Payroll Reconciliation Report	Payroll validation	Company, Month	Employee Count, Working Days, Present Days, Leave Days, LOP Days, OT Hours, Gross, Deductions, Net Payroll

---

6. *Payslip Reports*

Report Name	Purpose	Key Filters	Standard Fields / Columns
Payslip Generation Report	Track payslip generation	Company, Month, Status	Employee ID, Employee Name, Payroll Month, Gross Salary, Deductions, Net Salary, Payslip Status, Generated Date
Payslip Published Report	Track published payslips	Company, Month	Employee ID, Employee Name, Payroll Month, Published Date, Published By, Employee Access Status
Payslip Reprint Report	Track reprints	Company, Month, Employee	Employee ID, Employee Name, Payroll Month, Original Generation Date, Reprint Date, Reprinted By
Payslip Revision Report	Revised payslips	Company, Month	Employee ID, Employee Name, Original Version, Revised Version, Revision Reason, Revised Date, Revised By

---

7. *Asset Reports*

Report Name	Purpose	Key Filters	Standard Fields / Columns
Asset Master Report	Asset inventory	Company, Location, Asset Category, Status	Asset ID, Asset Name, Category, Serial No., Value, Company, Location, Returnable, Status
Asset Allocation Report	Employee asset allocation	Company, Location, Employee, Asset	Asset ID, Asset Name, Serial No., Employee ID, Employee Name, Allocation Date, Condition, Acknowledgement Status
Asset Return Report	Asset return tracking	Company, Location, Status	Asset ID, Employee ID, Employee Name, Allocation Date, Return Date, Return Condition, Accessories, Status
Pending Asset Report	Assets not returned	Company, Location, Employee, Exit Status	Employee ID, Employee Name, Asset ID, Asset Name, Allocation Date, Expected Return Date, Pending Days, Status
Asset Fine Report	Asset-related fines	Company, Location, Fine Status	Employee ID, Employee Name, Asset ID, Fine Type, Fine Amount, Reason, Approval Status, Recovered Amount, Outstanding
Asset Transfer Report	Asset movement	Company, Location, Date Range	Asset ID, Asset Name, Previous Employee/Location, New

Report Name	Purpose	Key Filters	Standard Fields / Columns
			Employee/Location, Transfer Date, Approved By
Asset Damage/Loss Report	Damage/loss tracking	Company, Location, Status	Asset ID, Employee ID, Employee Name, Incident Date, Incident Type, Description, Fine Amount, Approval Status

---

8. *Loan & Salary Advance Reports*

Report Name	Purpose	Key Filters	Standard Fields / Columns
Employee Loan Report	Loan master and outstanding	Company, Employee, Loan Status	Loan ID, Employee ID, Employee Name, Loan Amount, Interest, Tenure, Installment, Recovered, Outstanding, Status
Loan Application Report	Loan requests	Company, Date Range, Status	Request ID, Employee ID, Employee Name, Requested Amount, Purpose, Request Date, Approval Status, Approved Amount
Loan Recovery Report	Monthly loan recovery	Company, Month	Employee ID, Employee Name, Loan ID, Installment, Interest, Total Recovery, Outstanding
Salary Advance Report	Advance requests and recovery	Company, Month, Status	Advance ID, Employee ID, Employee Name, Requested Amount, Approved Amount, Recovery Amount, Recovered, Outstanding, Status
Outstanding Recovery Report	Pending employee recovery	Company, Employee, Recovery Type	Employee ID, Employee Name, Loan/Advance ID, Type, Original Amount, Recovered, Outstanding, Next Recovery Date

---

9. *Exit Reports*

Report Name	Purpose	Key Filters	Standard Fields / Columns
Resignation Report	Resignation tracking	Company, Department, Date Range, Status	Employee ID, Employee Name, Resignation Date, Notice Period, Expected LWD, Approved LWD, Status
Notice Period Report	Employees currently serving notice	Company, Location, Department	Employee ID, Employee Name, Resignation Date, Notice Period, LWD, Days Served, Days Remaining, Leave During Notice

Report Name	Purpose	Key Filters	Standard Fields / Columns
Exit Clearance Report	Clearance status	Company, Department, Exit Status	Employee ID, Employee Name, LWD, Attendance Clearance, Leave Clearance, Asset Clearance, Loan Clearance, Payroll Clearance, Overall Status
Pending Exit Clearance Report	Outstanding exit activities	Company, Employee, Clearance Type	Employee ID, Employee Name, LWD, Clearance Type, Pending Item, Pending With, Pending Days, Status
Full & Final Settlement Report	F&F calculation	Company, Date Range, Status	Employee ID, Employee Name, LWD, Salary Payable, Leave Encashment if Applicable, LOP, Notice Recovery, Loan, Advance, Asset Fine, Arrears, Net F&F
Exit Interview Report	Exit feedback	Company, Department, Exit Date	Employee ID, Employee Name, Exit Reason, Interview Date, Feedback, Comments, Interviewer
Relieving Letter Report	Relieving document tracking	Company, Date Range	Employee ID, Employee Name, LWD, Relieving Date, Document No., Generated Date, Issued Status

---

10. *Cross-Module Management Reports*

Report Name	Purpose	Key Filters	Standard Fields / Columns
Employee Lifecycle Report	Complete employee lifecycle	Company, Employee, Date Range	Employee ID, Joining Date, Confirmation Date, Transfers, Promotions, Salary Changes, Resignation Date, LWD, Exit Status
HR Exception Report	Consolidated HR exceptions	Company, Location, Exception Type, Status	Employee ID, Employee Name, Module, Exception Type, Date, Description, Status, Pending With, Ageing
Pending Approval Report	All pending approvals	Company, Module, Department, Approver	Reference No., Employee ID, Employee Name, Module, Request Type, Submitted Date, Pending With, Pending Days
Audit Trail Report	System activity	Company, Module, User, Date Range	User, Module, Transaction, Action, Old Value, New Value, Date/Time, IP/Device where applicable

Report Name	Purpose	Key Filters	Standard Fields / Columns
Notification Delivery Report	Notification monitoring	Company, Module, Notification Type, Status	Notification ID, Employee, Module, Event, Recipient, Channel, Sent Date/Time, Delivery Status, Failure Reason
Configuration Change Report	Settings changes	Company, Module, User, Date Range	Module, Configuration, Field, Old Value, New Value, Changed By, Changed Date/Time
Dashboard KPI Report	Management overview	Company, Location, Period	Total Employees, Active Employees, New Joiners, Exits, Present %, Absent %, Leave %, LOP, OT, Payroll, Pending Approvals

Standard Report Prototype

Field	Description
Report Name	Name of the selected report
Company	Select Company; mandatory where applicable
Location / Site	Select one/multiple/all locations
Department	Filter by department
Employee Category	Filter by employee category
Employee Type	Permanent / Temporary / Contract / Trainee etc.
Employee	Individual employee selection, where applicable
Designation / Grade	Filter by role/grade/designation
Reporting Supervisor	Filter employees under a particular supervisor
Date From	Report starting date
Date To	Report ending date
Month / Year	Applicable for monthly/annual reports
Status	Active / Pending / Approved / Rejected / Cancelled etc.
Leave Type	Applicable to leave reports
Attendance Status	Present / Absent / Late / Holiday / Weekly Off etc.

Field	Description
Exception Type	Missing Punch / Late / Early-Out / Regularization etc.
Export	Excel / PDF / CSV where applicable
Print	Print-friendly report format
Search	Search within report results
Column Selection	Allow authorized users to select additional report columns where applicable
Sorting	Sort by Employee, Date, Department, Status etc.
Grouping	Group by Company, Location, Department, Employee or Date
Report Generated Date/Time	System-generated timestamp
Generated By	User who generated the report

Standard Report Actions

Action	Description
View	View report on screen
Search	Search records using report filters
Filter	Apply multiple criteria
Sort	Sort report data
Group	Group data by selected field
Column Selection	Select fields to display where permitted
Export Excel	Export report to Excel
Export PDF	Generate printable PDF
Print	Print report
Refresh	Refresh report data
Save Filter	Save frequently used filter criteria where applicable

Action	Description
Schedule Report	Schedule recurring report delivery where required
Email Report	Send generated report to authorized recipients
Drill Down	Open detailed transaction records from summary reports
Audit	View source transaction/audit information

1. Employee Dashboard

Top Filters

Filter	Options / Logic	Purpose
Company	Company 1 / Company 2	Show employee data for the applicable company
Year	Current Year / Previous Year / Select Year	Year-wise view
Month	Current Month / Select Month	Monthly attendance, leave and payroll view
Date Range	From Date – To Date	Attendance and leave analysis
Dashboard View	Overview / Attendance / Leave / Payroll / Assets	Switch dashboard focus

Employee Dashboard Widgets & Graphs

Title	Key Points	Description
Employee Profile	Employee ID, Name, Designation, Department, Location, Supervisor, Status	Quick employee identification and employment summary
Today’s Attendance	Punch In, Punch Out, Shift, Working Hours, Status	Shows today's attendance status in real time
Monthly Attendance	Present, Absent, Late, Early-Out, Week Off, Holiday	Monthly attendance summary
Leave Balance	Available, Availed, Pending	Displays current leave entitlement and balance

Title	Key Points	Description
Leave Applications	Pending, Approved, Rejected	Shows current leave application status
Attendance Regularization	Pending, Approved, Rejected	Displays submitted attendance correction requests
OT Summary	Actual OT, Approved OT, Target OT, OT Amount	Shows employee overtime position
Payroll Summary	Gross, Deduction, Net Salary, LOP, OT	Current/latest payroll summary
Payslip	Latest Payslip, Previous Payslips	Direct access to generated payslips
Loan Summary	Approved Amount, Recovered, Outstanding	Shows employee loan position
Salary Advance	Advance Amount, Recovered, Outstanding	Shows salary advance status
Asset Summary	Allocated, Returned, Pending	Shows company assets currently assigned
Asset Return / Fine	Pending Return, Fine, Recovery	Displays outstanding asset-related obligations
Upcoming Holidays	Next Holidays	Shows applicable company/location holidays
Upcoming Leave	Approved Future Leave	Shows scheduled leave
Notifications	Pending Actions, Alerts, Reminders	Central employee notification area
Documents / Certificates	Available HR Documents	Quick access to employee letters and certificates

Employee Graphs

Graph	Type	Data
Attendance Trend	Line Graph	Present/Absent/Late by month
Leave Utilization	Bar Graph	Leave credited vs availed vs balance
Monthly Working Hours	Bar/Line Graph	Actual working hours vs expected hours
OT Trend	Line Graph	Approved OT hours/amount month-wise
Salary Trend	Line Graph	Gross/Net salary month-wise

Graph	Type	Data
Leave Distribution	Pie/Donut	Leave consumed by leave type

---

2. Manager / Supervisor Dashboard

The Manager dashboard should be **team-oriented**, rather than employee-oriented. A manager should immediately see **team attendance, leave, exceptions, approvals, OT and pending actions**.

Top Filters

Filter	Options / Logic	Purpose
Company	Company 1 / Company 2	Company-wise team view
Location / Site	All / Specific Location	Filter employees by site
Department	All / Specific Department	Department-wise monitoring
Category	All / Employee Category	Category-wise team analysis
Employee Type	Permanent / Contract / Temporary / Trainee etc.	Employee-type filtering
Employee	All / Individual Employee	Drill down to specific employee
Year	Current / Previous / Select Year	Year-wise analysis
Month	Current / Select Month	Monthly dashboard
Date Range	From Date – To Date	Attendance/leave period
Shift	All / Specific Shift	Shift-wise monitoring
Status	Active / Inactive / Exit etc.	Employee status filter

Manager Dashboard – KPI Widgets

Title	Key Points	Description
Total Team Members	Total employees under manager	Displays current team strength
Present Today	Present employees	Employees who have recorded valid attendance
Absent Today	Absent employees	Employees absent based on attendance rules
Late Today	Late employees	Employees exceeding configured grace period

Title	Key Points	Description
Early-Out	Early departures	Employees leaving before configured shift timing
Missing Punch	Missing IN/OUT	Employees requiring attendance correction
On Leave Today	Approved leave	Employees currently on approved leave
Pending Leave Approval	Pending applications	Leave applications awaiting manager action
Attendance Regularization	Pending requests	Attendance correction requests awaiting approval
Pending OT Approval	OT requests	OT requests requiring manager approval
Holiday/Week-Off Working	Employees working	Team members working on non-working days
Site Shutdown Attendance	Shutdown exceptions	Employees expected/actually working during shutdown
New Joiners	Current-period joining	Recently joined employees
Employees in Notice Period	Exit monitoring	Team members currently serving notice
Pending Exit Clearance	Clearance issues	Employees requiring manager action
Pending Actions	All approvals	Consolidated manager action queue

---

3. Manager Dashboard – Attendance Graphs

Graph	Type	Key Information
Daily Attendance Status	Stacked Bar	Present, Absent, Leave, Week Off, Holiday, Shutdown
Attendance Trend	Line	Team attendance percentage over selected period
Late Arrival Trend	Line	Number of late employees by day/month
Missing Punch Trend	Bar	Missing punch cases over selected period
Working Hours Analysis	Bar	Actual vs expected working hours
Department Attendance	Bar	Attendance percentage by department
Shift-wise Attendance	Bar	Attendance by shift

Graph	Type	Key Information
Employee Attendance Exceptions	Bar	Top employees with attendance exceptions

---

4. Manager Dashboard – Leave Graphs

Graph	Type	Key Information
Leave Applications Trend	Line	Leave applications by month
Leave Type Distribution	Bar/Pie	CL, SL, PL etc.
Team Leave Calendar	Calendar	Employee leave by date
Pending Leave by Employee	Bar	Employees with pending approvals
Leave Utilization	Bar	Entitled vs utilized leave
Department Leave Trend	Line	Leave consumption by department
Upcoming Leave	Timeline	Approved upcoming leave

---

5. Manager Dashboard – OT & Productivity

Widget / Graph	Type	Description
Actual OT Hours	KPI	Total approved OT hours
Target OT	KPI	Allocated target OT amount
OT Amount	KPI	Total payable OT
OT Pending Approval	KPI	OT awaiting approval
OT Trend	Line	Month-wise OT hours/amount
Employee-wise OT	Bar	OT by employee
Department-wise OT	Bar	OT by department
Holiday/Week-Off OT	Bar	OT performed on non-working days
Shutdown OT	Bar	OT generated during approved site shutdown

---

6. Manager – Approval & Action Center

This should be one of the **most prominent sections** of the dashboard.

Title	Key Points	Description
Leave Approval	Approve / Reject / Return	Pending leave applications
Attendance Regularization	Approve / Reject / Return	Attendance correction requests
OT Approval	Approve / Reject	OT requests
Comp-Off Approval	Approve / Reject	Comp-off requests
Site Shutdown Intimation	Review / Approve / Reject	Shutdown requests raised by Supervisor/Manager
Employee Requests	Pending actions	Other employee requests
Exit Clearance	Review / Approve	Employee exit-related tasks
Asset Clearance	Pending assets	Assets requiring manager confirmation
Escalated Items	Priority actions	Items exceeding approval SLA

Suggested Action Queue

Priority	Request	Employee	Date	Status	Action
High	Leave Approval	Employee A	12-Sep	Pending	Approve / Reject
High	Missing Punch	Employee B	11-Sep	Pending	Review
Medium	OT Approval	Employee C	10-Sep	Pending	Review
Medium	Comp-Off	Employee D	09-Sep	Pending	Review

---

7. Manager – Team Status Widget

A useful visual team-status widget:

Status	Information
Present	Employees currently present
Late	Employees who arrived late
Absent	Employees absent
On Leave	Approved leave
Week Off	Weekly off

Status	Information
Holiday	Holiday
Site Shutdown	Covered by approved shutdown
Missing Punch	Attendance exception
Official Duty	OD / Business Travel / WFH
Other Exception	Requires review

---

8. Manager – Employee Risk / Exception Widgets

Widget	Description
Repeated Late Employees	Employees exceeding configurable late threshold
Repeated Absence	Employees with frequent absences
Frequent Regularization	Employees frequently requesting corrections
High OT Employees	Employees exceeding OT threshold
Missing Punch Repetition	Employees with recurring missing punches
Leave Overuse	Employees approaching/exceeding leave limits
Pending Documents	Employees with incomplete documents
Probation Employees	Employees currently in probation
Notice Period Employees	Employees serving notice
Asset Pending Return	Employees with outstanding assets
Loan/Advance Outstanding	Employees with outstanding recoveries

---

9. Dashboard Navigation

Employee

Dashboard → My Attendance → My Leave → My Regularization → My OT → My Payroll → My Payslip → My Assets → My Loan/Advance → My Documents → Notifications

Manager

Dashboard → Team Attendance → Team Leave → Approvals → OT → Exceptions → Team Reports → Employee Details → Exit/Clearance → Notifications

10. Key Difference Between Employee & Manager Dashboard

Area	**Employee Dashboard**	**Manager Dashboard**
Primary Purpose	**My information**	**My team's information**
Attendance	Own attendance	Team attendance
Leave	Apply/view own leave	Approve/monitor team leave
Regularization	Submit request	Approve/review request
OT	Own OT	Team OT and approvals
Payroll	Own salary/payslip	Team payroll summary, if authorized
Assets	Own assets	Team asset status
Loans	Own loan/advance	Team outstanding summary, if authorized
Exceptions	Own exceptions	Team exceptions
Site Shutdown	View applicability	Intimate/review/monitor
Employee Profile	Own profile	Team employee profiles
Exit	Own exit status	Team exit/clearance
Reports	Personal reports	Team/department reports
Approvals	Generally, none	Primary approval center
Alerts	Personal alerts	Team alerts + escalations
